

INVESTMENT PHILOSOPHY

Olstein Capital Management believes:

- There is a strong correlation between above-average investment performance and error avoidance. To achieve long-term success, an investor must first consider downside risk, emphasizing financial risk (determined by the quality of a company's balance sheet; the quality of its earnings; and conservatism of its reporting techniques) before considering any potential for appreciation.
- A company's stock price often falls below its private market value due to temporary problems such as missed earnings estimates, over-reaction to short-term results or overall negative market psychology. These short-term deviations may present viable opportunities for the patient, long-term investor.
- Excess cash flow is the lifeblood of a business. Companies that generate excess cash flow also have the potential to enhance shareholder value by increasing dividend payments, repurchasing company shares, reducing outstanding debt, engaging in strategic acquisitions, being acquired or withstanding an economic downturn without adopting harmful short-term strategies.
- Forensic analysis of financial statements reveals the quality of a company's earnings, the success of its strategy, sustainability of its performance and impact of management decisions on future cash flow. Such analysis is more useful to an investor than management forecasts or earnings guidance.

INVESTMENT PROCESS HIGHLIGHTS

- Emphasizes investments in undervalued equity securities of companies with discernible financial strength, unique business fundamentals, competitive edge and ability to generate free cash flow.
- Analysis focuses on how a company's operations generate sustainable free cash flow; how much cash is available to investors and level of ongoing investment required to maintain and grow free cash flow.
- Valuations based on free cash flow. Reliable valuations require: determining if a company's accounting policies reflect business reality; assessing a company's Quality of Earnings; accounting adjustments to eliminate management bias, and identifying positive or negative factors that may affect future free cash flow.

PORTFOLIO MANAGEMENT

Robert A. Olstein, Founder and Chief Investment Officer of Olstein Capital Management ("OCM"), serves as Co-Portfolio Manager. In 1971 Mr. Olstein co-founded the *Quality of Earnings Report*, which pioneered inferential screening of financial statements to identify early warnings of potential changes in a company's future earnings power and value of its stock. Previously he was Senior Portfolio Manager at Smith Barney Inc. Mr. Olstein is a senior member of the New York Society of Securities Analysts, a past recipient of the Financial Analysts Federation (now CFA Institute) Graham & Dodd Scroll Award; and is the author of numerous articles on corporate reporting and disclosure practices. Mr. Olstein holds a B.A. in Mathematical Statistics and M.B.A. in Accounting from Michigan State University.

Eric R. Heyman serves as Co-Portfolio Manager of the All Cap Value Fund and as Executive Vice President and Director of Research at Olstein Capital Management. Since joining in 1996, Mr. Heyman has worked as an analyst for the Olstein All Cap Value Fund. Named OCM's Director of Research in 2005, Mr. Heyman oversees the Firm's research methodology, valuation procedures, ongoing generation of investment ideas, and company coverage. Previously Mr. Heyman held the position of Accountant with Norstar Energy. Mr. Heyman holds a B.B.A. in Accounting from Pace University.

Olstein Capital Management, L.P., serves as investment advisor to the Fund. Founded in 1995, OCM is an SEC registered investment advisor located in Purchase, NY, with approximately \$851 million in assets under management as of December 31, 2017.

Performance data quoted represents past performance. Past performance does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. The Olstein Funds follow a value-oriented investment approach. However, a particular value stock may not increase in price as the Investment Manager anticipates and may actually decline in price if other investors fail to recognize the stock's value or if a catalyst that the Investment Manager believes will increase the price of the stock does not occur or does not affect the price of the stock in the manner or to the degree that the Investment Manager anticipated. Also, the Investment Manager's calculation of a stock's private market value involves estimates of future cash flow which may prove to be incorrect and, therefore, could result in sales of the stock at prices lower than the Fund's original purchase price. Current performance may be lower or higher than performance quoted; to obtain performance data current to the most recent month end please go to our website at www.olsteinfunds.com.

The Russell 3000 Value Index measures the performance of the broad value segment of U.S. equity value universe. It includes those Russell 3000 companies with lower price-to-book ratios and lower forecasted growth values. The Russell 3000 Value Index is constructed to provide a comprehensive, unbiased, and stable barometer of the broad value market. The Russell 3000® Index is an unmanaged index that measures the performance of the 3,000 largest U.S. companies based on total market capitalization, and represents approximately 98% of the investable U.S. Equity market. Investors cannot actually make investments in either index.
