THE OLSTEIN ALL CAP VALUE FUND

Letter to Shareholders

Performance data quoted represents past performance. Past performance does not guarantee future results. All performance stated in this document assumes the reinvestment of dividends and capital gains. We caution shareholders that we can never predict or assure future returns on investments. The investment return and principal value of an investment with our Funds will fluctuate over time so that your shares, when redeemed, may be with more or less than their original cost. Current performance may be lower or higher than the performance data quoted. Click the following links for the annual expense ratios and standardized performance current to the most recent quarter and month end periods for The Olstein All Cap Value Fund.

DEAR FELLOW SHAREHOLDERS:

THE IMPORTANCE OF A LONG-TERM OUTLOOK

Dear Shareholders:

For the fiscal year ended June 30, 2011, Class C shares of the Olstein All Cap Value Fund appreciated 26.61% (prior to deduction of CDSC for shares held for less than 1 year). During the same twelve month period the S&P 500® Index appreciated 30.69% and the Russell 3000® Index appreciated 32.37%.

MARKET OUTLOOK AND OUR STRATEGY

Several related economic stories that have unfolded over the past year continue to cast a long shadow over the near-term outlook for U.S. equities. While the prospective collapse of individual economies within the Euro-zone has dominated headlines for the first half of the year, the growing debate about the best approach for addressing the U.S. deficit and slowdown in U.S. economic growth has unnerved equity markets since the close of the Fund's fiscal year. Although the global economy remains beleaguered by serious structural problems primarily rooted in the debt build-up that triggered the financial markets crisis of 2008, at this stage of the global and U.S. economic recovery we believe investors can find some relief and opportunities in greatly improved corporate financial performance.

Corporate balance sheets have improved significantly since the start of the Great Recession, particularly through the accumulation of sizeable cash positions and decreased leverage. Not only are cash flow yields and earnings yields considerably higher than current government bond yields it is also important to note that the companies and business models behind these yields have growth rates attached to them. Furthermore, many company management teams have proven themselves to be shrewd allocators of capital during the downturn and recovery. While the macroeconomic outlook remains clouded, investors should seek the opportunities presented by strong companies, with stable or growing free-cash-flow generating business that effectively utilize capital to generate long term value for shareholders.

PORTFOLIO AND PERFORMANCE REVIEW

We continue to focus on how individual companies have adapted their expectations, strategic plans and operations to current economic conditions, and how they have managed their assets to deliver future earnings to investors. Our current portfolio consists of companies that we believe have a sustainable competitive advantage, discernible balance sheet strength, a management team that emphasizes decisions based on cost of capital calculations and deploys free cash flow to create shareholder value. We believe companies with these characteristics are poised to eliminate the valuation gaps created by the recent bear market as the economic recovery eventually accelerates.

At June 30, 2011, the Olstein All Cap Value Fund portfolio consisted of 76 holdings with an average weighted market capitalization of \$48.01 billion. During the reporting period, the Fund initiated positions in 16 companies and strategically added to positions in 8 companies. Over the same time period, the Fund eliminated its holdings in 17 companies and strategically decreased its holdings in another 15 companies. Positions initiated during the past fiscal year include: Adobe Systems, Analog Devices, Ascena Retail Group, Avery Dennison, ConocoPhillips, Delta Air Lines, Entegris, Genuine Parts Co., International Game Technology, Jones Lang LaSalle, JP Morgan Chase & Co., Newell Rubbermaid, Nike, Oshkosh Truck Corp., Rockwell Collins, and Whirlpool Corp. Positions eliminated during the past fiscal year include: Brinker International, Burger King Holdings, Charles River Laboratories, Collective Brands, Commscope, Fidelity National Financial, Hewitt Associates, Hewlett Packard, Hospira, Jones Apparel Group, Korn/Ferry International, Molson Coors Brewing Co., NCR Corp., Novellus Systems, Pall Corp., RadioShack Corp., and Teradata Corp.

Our Laggards

Laggards during the fiscal year included Charles River Laboratories, Cisco Systems, RadioShack, Oshkosh Corporation, and Delta Air Lines. During the

course of the fiscal year the Fund eliminated its holdings in Charles River Laboratories and RadioShack. As of the close of the fiscal year the Fund continued to hold Cisco Systems, Oshkosh Corporation and Delta Air Lines. The Fund's positions in Oshkosh Corporation and Delta Air Lines were initiated during the course of the fiscal year, while Cisco is a long term holding in the Fund.

Although Cisco's common stock has performed negatively versus the overall market since the fourth quarter of 2010, we believe the company is at the center of macro trends driving increased bandwidth usage over time. Cisco's products center on supplying networks, corporations and consumers with technology that meets the increasing need for more data at faster speeds. We believe the company has positioned itself for long-term growth by investing in technologies of the future, like telepresence, the data center, cloud, computing and video delivery. These technologies are not only set to grow, but we expect that they will also drive increased demand for Cisco's core products – switches and routers so that the content deliverers can handle the increase in demand for bandwidth. There have been bumps along the road with respect to growth, margins and competition, but we believe that over the long-term Cisco will continue to execute effectively and develop new products that help drive secular growth.

Our Leaders

Stocks which contributed positively to our performance in fiscal year 2011 include Hewitt Associates, Korn/Ferry International, Commscope, Timken Co., and Agilent Technologies. It is important to note that during the fiscal year, the Fund benefitted from acquisition offers for both Hewitt Associates and Commscope at a substantial premium to average trading prices immediately preceding announcement of each acquisition. During the first quarter of 2011 the Fund eliminated its position in Korn/Ferry International as the company's stock reached our valuation levels. As of the close of the fiscal year the Fund continues to hold Timken Co. and Agilent Technologies.

THE IMPORTANCE OF A LONG-TERM OUTLOOK

Throughout the Fund's history and especially during the sharp market downturn of 2008 and 2009, we have consistently extolled the importance of investor patience and maintaining an investment outlook that does not react to the daily flow of good or bad news. As investors consider the current investment landscape with falling consumer sentiment, rising commodities prices, persistent unemployment, and a near term outlook for slower U.S. economic growth, it is important that we repeat the virtues of investor patience and a mindset that looks beyond the news and noise. Values are often generated by short-term negativity surrounding the general market and/or the economy,

short-lived factors affecting the industry in which the company operates or temporary issues affecting the company itself. When the negativity turns out to be related to short-term factors, patience is usually rewarded. During the first six months of 2011 alone, both the general and business media have emphasized a series of disasters and crises that have, in the short term, weakened investor confidence and rattled equity markets. Natural disasters, such as the earthquake and devastating tsunami in Japan, or rampant flooding and record-setting tornado activity throughout much of the southern United States, combined with political unrest in the Middle East and potential economic failures including the European debt crisis and the recent downgrade of U.S. sovereign debt, have greatly increased investor anxiety regarding equity investing. In addition, when investors consider downward revisions of U.S. GDP growth during the first half of the year combined with a near-term outlook for slower economic growth, we believe that the level of pessimism affecting equity markets could remain for a few months. However we are using this period to invest in companies that we believe are selling at prices that not only more than discounts the current negativity but pays little attention to the company's cash generating potential we envision over the next 2-3 years.

INVESTING IN COMPANIES, NOT IN THE MARKET

What investors usually overlook when caught up in the steady stream of bad news and constant predictions of falling equity prices is that bad news and market pessimism often create unique opportunities to buy quality companies with strong fundamentals at very compelling prices. As value investors, we believe that a long-term perspective, especially in an environment that is maniacally focused on short-term news and events, is critical to identifying and properly analyzing those investment opportunities that many other investors neglect or fail to see.

In our experience, pessimism about the direction of the overall market often blinds an investor to the future appreciation potential of companies with sustainable competitive advantage, discernible balance sheet strength, and management teams that emphasize decisions based on cost of capital calculations and deployment of free cash flow to create shareholder value. Companies with such characteristics are not only poised to overcome temporary valuation gaps created by market volatility, but are usually in a position to achieve greater capital appreciation as overall economic growth accelerates.

While the global economic outlook may be enough to cloud an investor's outlook, we believe the investment landscape is not all gloom and doom. More than three years on from the onset of the Great Recession, company balance sheets are in excellent shape with many companies flush with cash and holding little to no (or rapidly decreasing) debt loads. While many investors may

rely on GDP forecasts when making allocation and investment decisions, we believe over-reliance on macroeconomic predictions is often misguided. Though we believe investors are wise to be wary of risk, we also believe that instead of making equity investment decisions based on market sentiment, investors should focus on opportunities for meaningful capital appreciation presented by individual companies.

We believe that although the overall market can be basically flat, we are in an environment in which there are many individual opportunities that can offer investors the potential for above average appreciation. In this regard we believe that the most important metrics for identifying superior investment opportunities in an uncertain market is a company's ability to generate sustainable free cash flow. Although there may be lower GDP growth going forward, companies with strong balance sheets that have not only weathered the recession well, but have also demonstrated profitable revenue growth and an ability to allocate capital wisely during the economic recovery have the potential to outperform in a slow growth environment.

SOME FINAL THOUGHTS TO CONSIDER

Although we are cognizant of the fact that we could be faced with a period of constrained economic growth over the next year, we must point out that our portfolio primarily consists of fiscally strong, excess-cash-flow companies whose business, in our opinion, are primed to provide suitable returns whether or not the rebound is modest or accelerated. We believe the best approach for an uneven economic and investment environment is to buy companies that have the ability to generate free cash flow, have little or no debt or are aggressively paying down debt, and to buy such companies at a significant discount to their intrinsic values. We believe our long-term horizon, when combined with our emphasis on a forensic analysis of financial statements should increase the probability of achieving the Fund's investment objective of long-term capital appreciation as the economic recovery continues to unfold and eventually accelerates.

We continue to invest our money alongside yours; value your trust and thank you for your perseverance. We look forward to writing to you again at the close of the next quarter and remind you that we are working diligently to achieve the Fund's investment objectives.

Sincerely,

Robert A. Olstein
Chief Investment Officer

Eric R. Heyman
Co-Portfolio Manager

The following chart illustrates the growth, on a quarterly basis, of a hypothetical \$10,000 investment made in the Olstein All Cap Value Fund's Class C share at the Olstein All Cap Value Fund's inception date of September 21, 1995. (with dividends and capital gain distributions reinvested but no deduction of taxes on reinvested distributions – see “Details”)

Details

The performance data quoted represents past performance and does not guarantee future results. The Olstein All Cap Value Fund's Class C average annual return for the ten-year, five-year, and one-year periods ended 06/30/11, assuming reinvestment of dividends and capital gain distributions and deduction of the Olstein All Cap Value Fund's maximum CDSC during the one-year period, was 2.27%,

0.48%, and 25.61%, respectively. Per the Fund's 10/31/10 prospectus, the expense ratio for the Olstein All Cap Value Fund Class C was 2.32%. Expense ratios for other share classes will vary. Performance for other share classes will vary due to differences in sales charge structure and class expenses.

The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Value stocks can continue to be undervalued by the market for long periods of time. Current performance may be lower or higher than performance quoted. To obtain performance data current to the most recent month end, please go to our website at www.olsteinfunds.com.

The S&P 500[®] Index is an unmanaged index created by Standard & Poor's Corporation that includes a representative sample of 500 leading companies in leading industries of the U.S. economy and is considered to represent the U.S. stock-market performance in general. The Russell 3000[®] Index is an unmanaged index that measures the performance of the 3,000 largest U.S. companies based on total market capitalization, and represents approximately 98% of the investable U.S. Equity market. Investors cannot actually make investments in either index.

Comparison of the Change in Value of a Hypothetical \$10,000 Investment from the Fund's Class C for the past 10 years through the Fiscal Year End of 6/30/11. The line chart does not reflect any applicable Contingent Deferred Sales Charge. The returns listed in the table do not reflect the deduction of taxes on reinvested dividends.

- (1) Assumes reinvestment of dividends and capital gains. Also includes all expenses at the end of each period and assumes the deduction of the appropriate CDSC as if an investor had redeemed at the end of the one year period, and thus represents a "net return." The CDSC is based on the lesser of the original purchase price and the value of such shares at the time of redemption. Past performance is not necessarily indicative of future results. Investment returns and principal values may fluctuate, so that, when redeemed, shares may be worth more or less than their original cost.
- (2) The Russell 3000[®] Index reflects the broad U.S. equity universe and represents approximately 98% of the U.S. market. Russell 3000[®] Index return is adjusted upward to reflect reinvested dividends, but does not reflect the deduction of any fees or expenses associated with investments in the index, and thus represents a "gross return."
- (3) S&P 500[®] Index return is adjusted upward to reflect reinvested dividends, but does not reflect the deduction of any fees or expenses associated with investment in the index, and thus represents a "gross return."
- (4) Commenced operations on September 21, 1995.
- (5) On April 29, 2004, the Fund's Board approved changing the Fund's fiscal year-end to June 30.

Comparison of the Change in Value of a Hypothetical \$10,000 Investment from the Fund's Adviser Class for the past 10 years through the Fiscal Year End of 6/30/11. The returns listed in the table do not reflect the deduction of taxes on reinvested dividends.

(1) Assumes reinvestment of dividends and capital gains. Also includes all expenses for each period and thus represents a "net return". Past performance is not necessarily indicative of future results. Investment returns and principal values may fluctuate, so that, when redeemed, shares may be worth more or less than their original cost.

(2) The Russell 3000[®] Index reflects the broad U.S. equity universe and represents approximately 98% of the U.S. market. Russell 3000[®] Index return is adjusted upward to reflect reinvested dividends, but does not reflect the deduction of any fees or expenses associated with investments in the index, and thus represents a "gross return."

(3) S&P 500[®] Index return is adjusted upward to reflect reinvested dividends, but does not reflect the deduction of any fees or expenses associated with investment in the index, and thus represents a "gross return."

(4) Commenced operations on September 21, 1999.

(5) On April 29, 2004, the Fund's Board approved changing the Fund's fiscal year-end to June 30.

The accompanying notes are an integral part of these financial statements.

The Olstein All Cap Value Fund Expense Example as of June 30, 2011

As a shareholder of the Fund, you incur two types of costs: (1) transaction costs, including sales charges (loads) on purchase payments or contingent deferred sales charges on redemptions; if any; and (2) ongoing costs, including management fees; distribution fees (12b-1); and other Fund expenses. This Example is intended to help you understand your ongoing costs (in dollars) of investing in the Fund and to compare these costs with the ongoing costs of investing in other mutual funds. The Example is based on an investment of \$1,000 invested at the beginning of the period and held for the entire period, January 1, 2011 – June 30, 2011.

Actual Expenses The following table provides information about actual account values and actual expenses. You will be assessed fees for outgoing wire transfers, returned checks and stop payment orders at prevailing rates charged by U.S. Bancorp Fund Services, LLC, the Fund's transfer agent. If you request that a redemption be made by a wire transfer, currently a \$15 fee is charged by the Fund's transfer agent. IRA accounts will be charged a \$15 annual maintenance fee and a \$25 distribution fee. The following example includes, but is not limited to, management fees, distribution fees, fund accounting, custody and transfer agent fees. However, the following example does not include portfolio trading commissions and related expenses. You may use the information in this table, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the table under the heading entitled "Expenses Paid During Period" to estimate the expenses you paid on your account during this period.

Hypothetical Example for Comparison Purposes The following table also provides information about hypothetical account values and hypothetical expenses based on the Fund's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in the Fund and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as sales charges (loads) on purchase payments or contingent deferred sales charges on redemptions, if any. Therefore, the hypothetical information is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher.

	Beginning Account Value 1/1/11	Ending Account Value 6/30/11	Expenses Paid During Period* 1/1/11 – 6/30/11
Actual			
Class C	\$1,000.00	\$1,033.40	\$11.60
Adviser Class	\$1,000.00	\$1,037.60	\$7.83
Hypothetical (5% annual return before expenses)			
Class C	\$1,000.00	\$1,013.39	\$11.48
Adviser Class	\$1,000.00	\$1,017.11	\$7.75

* Expenses are equal to the Fund's annualized expense ratio of 2.30% and 1.55% for Class C and Adviser Class, respectively, multiplied by the average account value over the period, multiplied by 181/365 (to reflect the one-half year period).

THE OLSTEIN STRATEGIC OPPORTUNITIES FUND

Letter to Shareholders

Performance data quoted represents past performance. Past performance does not guarantee future results. All performance stated in this document assumes the reinvestment of dividends and capital gains. We caution shareholders that we can never predict or assure future returns on investments. The investment return and principal value of an investment with our Funds will fluctuate over time so that your shares, when redeemed, may be with more or less than their original cost. Current performance may be lower or higher than the performance data quoted. Click the following links for the annual expense ratios and standardized performance current to the most recent quarter and month end periods for The Olstein Strategic Opportunities Fund.

DEAR FELLOW SHAREHOLDERS:

For the fiscal year ended June 30, 2011, Class A shares (load-waived) of the Olstein Strategic Opportunities Fund increased 37.57%, compared to a return of 39.28% for the Russell 2500™ Index and a return of 30.69% for the S&P 500® Index over the same time period.

MARKET OUTLOOK

While the potential collapse of individual European economies has dominated headlines during the first half of the year, the growing U.S. deficit and slowdown in economic growth has unnerved equity markets since the close of the Fund's fiscal year, exposing deep investor concerns regarding the strength of the recovery and renewing fears of a possible double-dip recession. Although we do not believe that the double-dip recession scenario will unfold, we recognize that a more stable economic recovery requires resolution of sovereign debt crises, a significant reduction in high levels of unemployment and improved price stability in the U.S. housing market.

Even though the global economy remains beleaguered by serious structural problems primarily rooted in the debt build-up that triggered the financial markets crisis of 2008, at this stage of the economic recovery we believe investors

can find some relief and opportunities in greatly improved corporate financial performance. Corporate balance sheets have improved significantly since the start of the Great Recession, particularly through decreased debt loads and the accumulation of sizeable cash positions. Not only are cash flow yields and earnings yields considerably higher than current government bond yields it is also important to keep in mind that the companies and business models behind these yields also have growth rates attached to them. Furthermore, many company management teams have proven themselves to be shrewd allocators of capital during the downturn and recovery. Even though the macroeconomic outlook remains clouded, we believe that the Fund's portfolio consists of strong companies with stable or growing free cash flow that are effectively utilizing capital to generate long term shareholder value.

PORTFOLIO AND PERFORMANCE REVIEW

At June 30, 2011, the Fund's portfolio consisted of 38 holdings with an average weighted market capitalization of \$3.43 billion. Throughout the fiscal year ended June 30, 2011, we continued to modify the portfolio to maintain what we believed was the appropriate defensive posture in light of market volatility, while at the same time, capitalizing on that volatility to take advantage of compelling buying opportunities in what we believe are well-run, well-capitalized companies selling at significant discounts to our determination of their intrinsic value.

During the fiscal year, the Fund initiated positions in thirteen companies and strategically added to established positions in nine companies. Positions initiated during the reporting period include: Ascena Retail Group, CareFusion Corp., CTS Corp., Dorman Products, DSW, Inc., Ferro Corp., Hillenbrand Inc., Measurement Specialties Inc., Oshkosh Corp., Rocky Brands, Schweitzer-Mauduit International, Inc., Steinway Musical Instruments, Inc., and Team Inc.

Over the same time period, the Fund eliminated its holdings in fourteen companies and strategically reduced its holdings in another four companies. The Fund eliminated or reduced its holdings in companies that either reached our valuation levels or where changing conditions or new information resulted, in our opinion, in additional risk and/or reduced appreciation potential. We redeployed proceeds from such sales into opportunities that we believe offer a more favorable risk/reward profile. Positions eliminated during the fiscal year include: Brinker International, Burger King Holdings, Charles River Laboratories, Collective Brands, Inc., Commscope Inc., Conmed Corporation, Cracker Barrel Old Country Store, Fidelity National Financial, Hewitt Associates, Jack in the Box, Inc., Jones Apparel Group, Medical Action Industries, Middleby Corp., and RadioShack.

In an exceptional occurrence during the course of the fiscal year, the Fund initiated and eliminated its positions in Korn/Ferry International and 99 Cents Only Stores at material profits over relatively short periods of time. The Fund initiated its position in Korn/Ferry in August 2010 at a price of \$14.03 per share and sold out of the position in December 2010 at an average price of \$23.16 per share. The Fund initiated its position in 99 Cents Only Stores in late-November 2010 and continued to build its position until early February 2011 at an average price per share of \$15.93. The Fund liquidated its position in 99 Cents Only Stores on March 11, 2011 at an average price of \$19.60 per share following announcement of a bid to acquire the company by Los Angeles-based private equity firm Leonard Green & Partners. Additionally, during the reporting period the Fund benefitted from acquisition offers for both Hewitt Associates and Commscope at substantial premiums to average trading prices immediately preceding announcement of each acquisition.

Our Laggards

The biggest detractors from performance during the fiscal year include: specialty footwear and apparel manufacturer, Rocky Brands, Inc.; consumer electronics retailer, RadioShack; disposable medical products manufacturer and supplier, Medical Action Industries Inc.; electronics components and sensor manufacturer, CTS Corp.; and access equipment and specialty vehicle manufacturer, Oshkosh Corporation. During the course of the fiscal year the Fund eliminated its holdings in Medical Action Industries, CTS Corp., and RadioShack. As of the close of the fiscal year the Fund continued to hold Rocky Brands and Oshkosh Corporation.

Our Leaders

Notable gainers in the Fund's portfolio during the reporting period, include: specialty footwear retailer, DSW Inc.; supplier and servicer for the semiconductor manufacturing process, Entegris, Inc.; machine tools and accessories manufacturer, Timken Co.; automotive replacement part designer and manufacturer, Dorman Products; and specialty footwear and apparel retailer, Finish Line Inc.

REVIEW OF ACTIVIST HOLDINGS

As of June 30, 2011, the Fund was invested in eight activist situations, which represented approximately 24% of the Fund's equity investments and two of its top ten holdings. In general, these situations fit our definition of an activist investment where an outside investor, usually a hedge fund, private equity investor, or Olstein Capital Management seeks to influence company management to adopt strategic alternatives that we expect to unlock greater shareholder value.

The Fund's activist holdings as of June 30, 2011 include global asset management firm, Legg Mason Inc.; audio products and electronic systems manufacturer, Harman International; business technology and services company, NCR Corp.; document systems and services company, Xerox; tool and equipment manufacturer, Snap-on Inc.; medical technology company, CareFusion, musical instruments manufacturer, Steinway Musical Instruments, and funeral services products company, Hillenbrand, Inc. We continue to monitor the progress of the activist investors involved in these situations as they work to increase shareholder value through a specific plan for improving each company's results. While each investment is at a different strategic stage, we believe the actions that have been proposed or implemented should increase shareholder value through improved future operating results.

With each of our activist situations, one of the most important variables we consider, especially during tough economic times, is "how long do we expect it to take for this company to improve its operations and results?" Although we know from experience that successful turnarounds don't happen overnight, we do expect specific improvements in operations to occur within a defined period of time (two years or less) notwithstanding the economic environment. Although a turnaround process may not be in full swing, if a company has adopted what we believe is the right strategy to increase shareholder value within two years, we are willing to wait beyond two years for operating results to start to improve if we are being sufficiently rewarded for the risk, and if our ongoing analysis of the company's financial statements tell us the company is headed in the right direction.

OUTLOOK FOR ACTIVIST INVESTING

Since its November 2006 inception the Fund has maintained a significant commitment to activist situations with an average activist exposure of 27% of total equity investments since inception. The Fund's activist exposure reached a high of 39% of equity investments during the second quarter of 2008 and a low of 7% of equity investments during the second quarter of 2009 (as the Fund committed its capital to compelling value situations created by the market lows of March 2009 in lieu of longer-term activist situations).

Throughout the remainder of 2011 and into 2012 we will actively seek additional investments for the Fund's portfolio that fit our approach to activist investing. The criteria for our activist investments includes companies whose stock prices are significantly below our determination of private market value; companies that may be overcapitalized; companies with strong brands or franchises but suffering the effects of bad strategic decisions; as well as companies with non-core, underutilized, underperforming or non-productive assets. Even though a potential activist investment may be characterized by one of these

attributes, we also look for specific financial characteristics that, from our past experience, strongly favor pursuit of an activist agenda. These financial characteristics include:

- High cash balances
- Reliable and steady cash flow combined with low returns on invested capital
- Questionable merger & acquisition activity
- Unrelated businesses or divisions which may have more value as stand alone entities
- Extremely low valuation multiples
- Consistent earnings underperformance

We expect that as the economic recovery continues to unfold in an uneven and somewhat rocky manner, that equity markets will provide ample opportunities to identify suitable activist situations for the Fund's portfolio. Three primary reasons lie behind our expectations: (1) the bumpy road to more "normal" operating conditions should highlight which companies affected by the recession that have the potential to improve their operating results; (2) louder calls for stronger corporate governance from investors and regulatory bodies alike are likely to increase management responsiveness to shareholders, and (3) bearish reactions to every bump on the road to economic recovery should create compelling buying opportunities for deep value and activist investors.

As the economy improves and markets begin to focus on company fundamentals and profits, we expect to see greater emphasis on the value enhancement strategies we favor as an activist investor for those companies that temporarily lag their competitors and peers. We believe that for the remainder of 2011 and into 2012 as the depths of recession fade into memory, more companies should be receptive to adopting strategic alternatives in order to undertake much-needed turnarounds in order to improve their operating results.

As recession recedes and economic recovery unfolds, we expect equity markets to heighten their focus on company fundamentals and operating performance. Since time has taught us that patience provides generous opportunities for the diligent investor, we intend to stay the course, invested in companies that, in our opinion, have the financial strength to ride out any remnants of the downturn while offering favorable long-term business prospects.

SOME FINAL THOUGHTS

Economic recoveries are bumpy and we expect that the daily barrage of economic news, however slight, is likely to cause periods of increased market

volatility. We believe the best approach for an uneven economic and investment environment is to buy companies that have the ability to generate free cash flow, have little or no debt or are aggressively paying down debt, and to buy such companies at a significant discount to their intrinsic value. These valuations gaps should eventually close as market volatility subsides and investors take their minds off the day-to-day news and focus on the fact that such companies are adding to shareholder value over time.

While investors are understandably unsettled by volatility that has recently characterized equity markets, we believe it is important to maintain a mindset that looks beyond daily market moves with an understanding that the market should eventually recognize companies with strong fundamentals, stable cash flow and above-average operating returns. During the second half of 2011 we expect the market to reward companies that have practiced sound capital management, focused their priorities during the prolonged downturn, and continued to deliver high-quality earnings to shareholders.

We continue to invest our money alongside yours, value your trust and thank you for your perseverance. We look forward to writing to you again at the close of the next quarter and remind you that we are working diligently to achieve the Fund's investment objectives.

Sincerely,

Eric R. Heyman
Co-Portfolio Manager

Robert A. Olstein
Chairman, Chief Investment Officer
and Co-Portfolio Manager

The above commentary represents the opinion of the Manager, and is not intended to be a forecast of future events, a guarantee of future results, or investment advice. This information should be preceded or accompanied by a current prospectus, which contains more complete information, including investment objectives, risks, and charges and expenses of the Fund and should be read carefully before investing. A current prospectus may be obtained by calling (800) 799-2113 or by visiting the Fund's Website at www.olsteinfunds.com.

An investment in a portfolio containing small- and mid-cap companies is subject to additional risks, as the share prices of small- and mid-cap companies are often more volatile than those of larger companies due to several factors, including limited trading volumes, products, financial resources, management inexperience and less publicly available information. Investing in a non-diversified, narrowly focused fund

may entail greater risks than is normally associated with more widely diversified funds. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost.

There is no assurance that the Olstein Funds will achieve their investment objective. The activist strategy invests in stocks of underperforming companies and any shareholder activism might not result in a change in performance or corporate governance. These stocks could also experience less liquidity and higher share price and trading volume volatility than stocks of other companies.

The S&P 500[®] Index is an unmanaged index created by Standard & Poor's Corporation that includes a representative sample of 500 leading companies in leading industries of the U.S. economy and is considered to represent the U.S. stock-market performance in general. The S&P 500[®] Index is not an investment product available for purchase. The Russell 2500[®] Index is an unmanaged index created by The Russell Investment Group. The Russell 2500[®] is constructed to provide a comprehensive and unbiased barometer for the small to mid-cap segment and is completely reconstituted annually to ensure larger stocks do not distort the performance and characteristics of the true small to mid-cap opportunity set. The Russell 2500[®] includes the smallest 2500 securities in the Russell 3000[®]. The Russell 2500[®] Index is not an investment product available for purchase.

Comparison of the Change in Value of a Hypothetical \$10,000 Investment from the Fund's Class A Inception through the Fiscal Year End of 6/30/11. The returns listed in the table do not reflect the deduction of taxes on reinvested dividends.

⁺ Commencement of operations was November 1, 2006.

- (1) Assumes reinvestment of dividends and capital gains. Reflects the effect of the maximum sale load charge of 5.50% in load adjusted return. Past performance is not necessarily indicative of future results. Investment returns and principal values may fluctuate, so that, when redeemed, shares may be worth more or less than their original cost.
- (2) The Russell 2500[®] Index measures the performance of the 2,500 smallest companies in the Russell 3000[®] Index. Russell 2500[®] Index return is adjusted upward to reflect reinvested dividends, but does not reflect the deduction of any fees or expenses associated with investments in the index, and thus represents a "gross return."
- (3) S&P 500[®] Index return is adjusted upward to reflect reinvested dividends, but does not reflect the deduction of any fees or expenses associated with investment in the index, and thus represents a "gross return."

Comparison of the Change in Value of a Hypothetical \$10,000 Investment from the Fund's Class C Inception through the Fiscal Year End of 6/30/11. The line chart does not reflect any applicable Contingent Deferred Sales Charge. The returns listed in the table do not reflect the deduction of taxes on reinvested dividends.

⁺ Commencement of operations was November 1, 2006.

- (1) Assumes reinvestment of dividends and capital gains. Also includes all expenses at the end of each period and assumes the deduction of the appropriate CDSC as if an investor had redeemed at the end of the one year period, and thus represents a "net return." The CDSC is based on the lesser of the original purchase price or the value of such shares at the time of redemption. Past performance is not necessarily indicative of future results. Investment returns and principal values may fluctuate, so that, when redeemed, shares may be worth more or less than their original cost.
- (2) The Russell 2500[®] Index measures the performance of the 2,500 smallest companies in the Russell 3000[®] Index. Russell 2500[®] Index return is adjusted upward to reflect reinvested dividends, but does not reflect the deduction of any fees or expenses associated with investments in the index, and thus represents a "gross return."
- (3) S&P 500[®] Index return is adjusted upward to reflect reinvested dividends, but does not reflect the deduction of any fees or expenses associated with investment in the index, and thus represents a "gross return."

The Olstein Strategic Opportunities Fund

Expense Example as of June 30, 2011

As a shareholder of the Fund, you incur two types of costs: (1) transaction costs, including sales charges (loads) on purchase payments or contingent deferred sales charges on redemptions, if any; and (2) ongoing costs, including management fees; distribution fees (12b-1); and other Fund expenses. This Example is intended to help you understand your ongoing costs (in dollars) of investing in the Fund and to compare these costs with the ongoing costs of investing in other mutual funds. The Example is based on an investment of \$1,000 invested at the beginning of the period and held for the entire period, January 1, 2011 – June 30, 2011.

Actual Expenses The following table provides information about actual account values and actual expenses. You will be assessed fees for outgoing wire transfers, returned checks and stop payment orders at prevailing rates charged by U.S. Bancorp Fund Services, LLC, the Fund's transfer agent. If you request that a redemption be made by a wire transfer, currently a \$15 fee is charged by the Fund's transfer agent. IRA accounts will be charged a \$15 annual maintenance fee and a \$25 distribution fee. The following example includes, but is not limited to, management fees, distribution fees, fund accounting, custody and transfer agent fees. However, the following example does not include portfolio trading commissions and related expenses. You may use the information in this table, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the table under the heading entitled "Expenses Paid During Period" to estimate the expenses you paid on your account during this period.

Hypothetical Example for Comparison Purposes The following table also provides information about hypothetical account values and hypothetical expenses based on the Fund's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in the Fund and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as sales charges (loads) on purchase payments or contingent deferred sales charges on redemptions, if any. Therefore, the hypothetical information is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher.

	Beginning Account Value 1/1/11	Ending Account Value 6/30/11	Expenses Paid During Period* 1/1/11 – 6/30/11
Actual			
Class A	\$1,000.00	\$1,029.70	\$8.05
Class C	\$1,000.00	\$1,026.00	\$11.80
Hypothetical (5% annual return before expenses)			
Class A	\$1,000.00	\$1,016.86	\$8.00
Class C	\$1,000.00	\$1,013.14	\$11.73

* Expenses are equal to the Fund's annualized expense ratio of 1.60% and 2.35% for Class A and Class C, respectively, multiplied by the average account value over the period, multiplied by 181/365.

The Olstein Funds

Notes to Financial Statements

- 1 Description of the Funds** The Olstein Funds (the “Trust”), a Delaware statutory trust organized on March 31, 1995, is registered under the Investment Company Act of 1940, as amended (the “1940 Act”), as an open-end investment management company. The Trust consists of two series of shares, the Olstein All Cap Value Fund (“All Cap Value Fund”) and the Olstein Strategic Opportunities Fund (“Strategic Fund”) (collectively, the “Funds”). The All Cap Value Fund is a diversified investment management company and the Strategic Fund is a non-diversified investment management company. The primary investment objective of each Fund is long-term capital appreciation with a secondary objective of income. The All Cap Value Fund commenced investment operations on September 21, 1995 and the Strategic Fund commenced operations on November 1, 2006.

The All Cap Value Fund issued a second class of shares, Adviser Class shares, and renamed the initial class as Class C shares on September 1, 1999. The Adviser Class shares were initially sold on September 21, 1999 and are subject to expenses pursuant to the Shareholder Servicing and Distribution Plan described in Note 6. The Class C shares are subject to a contingent deferred sales charge (“CDSC”) for redemptions in accordance with the All Cap Value Fund’s prospectus, and expenses pursuant to the Shareholder Servicing and Distribution Plan described in Note 6. The maximum CDSC is 1.00% based on the lesser of the original purchase price or the value of such shares at the time of redemption for Class C shares within one year of purchase.

The Strategic Fund offers Class A and Class C shares, which are subject to expenses pursuant to the Shareholder Servicing and Distribution Plan described in Note 6. Class A shares have a maximum front-end sales charge of 5.50% that is included in the offering price of the Class A shares. The Class C shares are subject to a CDSC for redemptions within one year of purchase in accordance with the Strategic Fund’s prospectus. The maximum CDSC is 1.00% based on the lesser of the original purchase price or the value of such shares at the time of redemption.

- 2 Significant Accounting Policies** The following is a summary of the significant accounting policies of the Funds:

Security Valuation. The Funds' securities, except short-term investments with maturities of 60 days or less at the time of purchase and securities traded on the NASDAQ NMS and Small Cap exchanges, are valued at their market value as determined by their last sale price in the principal market in which these securities are normally traded. Lacking any sales, the security is valued at the mean between the closing bid and ask price. Securities traded on NASDAQ are valued at the NASDAQ Official Closing Price ("NOCP"). Short-term investments with remaining maturities of 60 days or less at the time of purchase are valued at amortized cost, which approximates market value, unless the Funds' Board of Trustees determines that this does not represent fair value. The value of all other securities, for which no quotations are readily available, is determined in good faith by, or under procedures approved by, the Board of Trustees. The Board has adopted specific procedures for valuing portfolio securities and delegated the implementation of these procedures to Olstein Capital Management, L.P. ("Olstein" or the "Investment Manager"). The procedures authorize the Investment Manager to make all necessary determinations regarding the fair value of a portfolio security and to report such determinations to the Board of Trustees. The Funds use independent pricing services to assist in pricing portfolio securities.

The Trust has adopted fair valuation accounting standards which establish an authoritative definition of fair value and set out a hierarchy for measuring fair value. These standards require additional disclosures about the various inputs and valuation techniques used to develop the measurements of fair value and a discussion of changes in valuation techniques and related inputs during the period. These standards define fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Management has determined that these standards have no material impact on the Funds' financial statements. The fair value hierarchy is organized into three levels based upon the assumptions (referred to as "inputs") used in pricing the asset or liability. These standards state that "observable inputs" reflect the assumptions market participants would use in pricing the asset or liability based on market data obtained from independent sources and "unobservable inputs" reflect an entity's own assumptions about the assumptions market participants would use in pricing the asset or liability. These inputs are summarized in the three broad levels listed below.

Level 1 – Quoted unadjusted prices for identical instruments in active markets to which the Trust has access at the date of measurement.

Level 2 – Quoted prices for similar instruments in active markets; quoted prices for identical or similar instruments in markets that are not active; and model-derived valuations in which all significant inputs and significant value drivers are observable in active markets. Level 2 inputs are those in markets for which there are few transactions, the prices are not current, little public information exists or instances where prices vary substantially over time or among brokered market makers.

Level 3 – Model derived valuations in which one or more significant inputs or significant value drivers are unobservable. Unobservable inputs are those inputs that reflect the Trust's own assumptions that market participants would use to price the asset or liability based on the best available information.

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The following is a summary of the inputs used to value the Funds' net assets as of June 30, 2011:

	Level 1	Level 2	Level 3	Total

There were no significant transfers into or out of Level 1 and Level 2 fair value measurements during the reporting period, as compared to their classification from the most recent annual report.

On January 21, 2010, the FASB issued ASU 2010-06, Improving Disclosures about Fair Value Measurements. ASU 2010-06 amends ASC 820, Fair Value Measurements and Disclosures, to require additional disclosures regarding fair value measurements. Specifically, the amendment requires reporting entities to disclose i) the input and valuation techniques used to measure fair value for both recurring and nonrecurring fair value measurements, for Level 2 or Level 3 positions, ii) transfers between all levels (including Level 1 and Level 2) will be required to be disclosed on a gross basis (i.e. transfers out must be disclosed separately from transfers in) as well as the reason(s) for the transfers and iii) purchases, sales, issuances and settlements must be shown on a gross basis in the Level 3 rollforward rather than as one net number.

The effective date of this guidance is for interim and annual periods beginning after December 15, 2009; however, the requirement to provide the Level 3 activity for purchases, sales, issuances and settlements on a gross basis will be effective for interim and annual periods beginning after December 15, 2010. The Funds have disclosed the applicable requirements of this accounting standard in their financial statements.

In May 2011, the FASB issued ASU No. 2011-04 “Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements” in GAAP and the International Financial Reporting

Standards (“IFRSs”). ASU No. 2011-04 amends FASB ASC Topic 820, Fair Value Measurements and Disclosures, to establish common requirements for measuring fair value and for disclosing information about fair value measurements in accordance with GAAP and IFRSs. ASU No. 2011-04 is effective for fiscal years beginning after December 15, 2011 and for interim periods within those fiscal years. Management is currently evaluating the impact these amendments may have on the Fund’s financial statements.

In preparing these financial statements, the Trust has evaluated events after June 30, 2011 and determined that there were no significant subsequent events that would require adjustment to or additional disclosure in these financial statements.

Federal Income Taxes. Each Fund intends to continue to qualify for treatment as a “regulated investment company” under Subchapter M of the Internal Revenue Code of 1986 and to distribute all of its taxable income to its shareholders. Therefore, no federal income tax provision has been provided.

Distributions to Shareholders. Generally, distributions are declared and paid at least annually. The Funds may utilize earnings and profits distributed to shareholders on redemption of shares as part of the dividend paid deduction.

Distributions of net investment income and net realized gains, if any, are determined in accordance with income tax regulations, which may differ from U.S. generally accepted accounting principles. These differences are either temporary or permanent in nature. To the extent these differences are permanent, reclassifications are made in the capital accounts in the period that the difference arises.

Accordingly, at June 30, 2011, reclassifications were recorded as follows.

	All Cap Value Fund	Strategic Opportunities Fund
Undistributed net investment income	\$4,771,830	\$241,406
Accumulated gains (losses)	(413,115)	(20,555)
Capital stock	(4,358,715)	(220,851)

Use of Estimates in the Preparation of Financial Statements. The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and

disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results may differ from those estimates.

Other. Investment security transactions are accounted for on a trade date basis. The Funds use the specific identification method for determining realized gain or loss on investments for both financial and federal income tax reporting purposes. Dividend income is recognized on the ex-dividend date or as soon as information is available to the Funds and interest income is recognized on an accrual basis. Income, realized and unrealized gains or losses on investments are allocated to each class of shares based on each Fund's relative net assets. All discounts and premiums are amortized using the effective interest method for tax and financial reporting purposes.

Expenses. Expenses directly attributable to a class of shares, such as Rule 12b-1 distribution fees, are charged to that class. Expenses that are not attributable to a particular class are typically allocated within each Fund among each class in proportion to their respective net assets.

- 3 Purchases and Sales of Investment Securities** During the year ended June 30, 2011, purchases and sales of investment securities (excluding short-term investments) were as follows:

	Purchases	Sales
All Cap Value Fund	\$228,240,145	\$315,986,931
Strategic Fund	\$14,133,842	\$11,593,765

The Funds did not purchase long-term U.S. Government securities as a part of their investment strategy during the respective periods.

4 Tax Information At June 30, 2011, the components of accumulated earnings/losses on a tax basis were as follows:

	All Cap Value Fund	Strategic Opportunities Fund
Cost of Investments	\$530,098,761	\$20,067,674
Gross unrealized appreciation	\$107,957,330	\$4,276,436
Gross unrealized depreciation	(27,413,140)	(1,155,042)
Net unrealized appreciation	\$80,544,190	\$3,121,394
Undistributed ordinary income	—	—
Undistributed long-term capital gain	—	—
Total distributable earnings	\$—	\$—
Other accumulated losses	\$(248,979,544)	\$(1,871,906)
Total accumulated gains (losses)	\$(168,435,354)	\$1,249,488

The difference between book-basis and tax-basis net unrealized appreciation is attributable primarily to the tax deferral of losses on wash sales and partnership adjustments.

At June 30, 2011, the accumulated capital loss carryforwards were as follows:

	All Cap Value Fund	Strategic Opportunities Fund
Expiring in 2017	\$90,581,251	\$—
Expiring in 2018	158,398,293	1,871,906
Total capital loss carryforwards	\$248,979,544	\$1,871,906

To the extent the Funds realize future net capital gains, taxable distributions will be reduced by any unused capital loss carryforwards as permitted by the Internal Revenue Code. During the year ended June 30, 2011, the All Cap Value Fund and Strategic Opportunities Fund utilized capital loss carryforwards of \$75,079,523 and \$1,916,613, respectively.

The Funds made no distributions of ordinary income and long-term capital gains during the year ended June 30, 2011 and year ended June 30, 2010.

On December 22, 2010, the Regulated Investment Company Modernization Act of 2010 (the “Act”) was enacted, which changed various technical rules governing the tax treatment of regulated investment companies. The changes are generally effective for taxable years beginning after the date of enactment. One of the more prominent changes addresses capital loss carryforwards. Under the Act, each fund will be permitted to carry forward capital losses incurred in taxable years beginning

after the date of enactment for an unlimited period. However, any losses incurred during those future taxable years will be required to be utilized prior to the losses incurred in pre-enactment taxable years, which carry an expiration date. As a result of this ordering rule, pre-enactment capital loss carryforwards may be more likely to expire unused. Additionally, post-enactment capital loss carryforwards will retain their character as either short-term or long-term capital losses rather than being considered all short-term as permitted under previous regulation.

The Trust has adopted financial reporting rules regarding recognition and measurement of tax positions taken or expected to be taken on a tax return. The Trust has reviewed all open tax years and major jurisdictions and concluded that there is no impact on the Funds' financial position or results of operations. Tax years that remain open to examination by major tax jurisdictions include tax years ended June 30, 2008 through June 30, 2011. There is no tax liability resulting from unrecognized tax benefits relating to uncertain income tax positions taken or expected to be taken on tax returns as of June 30, 2011. The Funds are also not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will significantly change in the next twelve months. If applicable, the Funds would recognize interest accrued related to unrecognized tax benefits in "interest expense" and penalties in "other expense" on the statement of operations.

- 5 Investment Management Fee and Other Agreements** The Funds employ Olstein as the investment manager. Pursuant to investment management agreements with the Funds, the Investment Manager selects investments and supervises the assets of the Funds in accordance with the investment objectives, policies and restrictions of the Funds, subject to the supervision and direction of the Board of Trustees. For its services, the Investment Manager earns a monthly fee at the annual rate of 1.00% for the first \$1 billion, 0.95% for \$1 billion to \$1.5 billion, 0.90% for \$1.5 billion to \$2 billion, 0.85% for \$2 billion to \$2.5 billion, 0.80% for \$2.5 billion to \$3 billion and 0.75% for over \$3 billion of the All Cap Fund's average daily net assets and 1.00% of the Strategic Fund's average daily net assets. For the year ended June 30, 2011, the All Cap Value Fund incurred investment management fees of \$6,036,574, with \$491,901 payable to the Investment Manager as of June 30, 2011. For the same period, the Strategic Fund incurred management fees of \$193,999, with \$7,589 net payable to the Investment Manager as of June 30, 2011. The investment

manager receivables and payables are settled monthly. The Investment Manager has agreed to contractually waive or reduce all or a portion of its management fee and, if necessary, to bear certain other expenses to limit the annualized expenses of the Strategic Fund to 1.35%, exclusive of 12b-1 and shareholder servicing fees, acquired fund fees and expenses, taxes, interest and non-routine expenses. This agreement extends until October 28, 2011 and may be continued thereafter. The Investment Manager may seek reimbursement of its waived fees and expenses borne for a rolling three-year period following the fiscal year such fee waivers and expense reimbursements are incurred, provided that the reimbursement by the Strategic Fund of the Investment Manager will not cause total operating expenses to exceed the expense cap as then may be in effect or the expense cap in place at the time of the fee waiver.

	Strategic Fund
Reimbursed/Absorbed Expenses Subject to Recovery by Investment Manager Until:	
2012	\$108,501
2013	100,047
2014	90,126
Total	\$298,674

Certain trustees and officers of the Trust are also officers of the Trust's Investment Manager. Such trustees and officers are paid no fees by the Trust for serving as trustees or officers of the Trust.

- 6 Shareholder Servicing and Distribution Plans** Olstein (the "Distributor") has entered into a distribution and underwriting agreement with the Funds dated August 18, 1995 (subsequently revised on July 29, 1999 to reflect the additional class and further amended and restated effective October 1, 2007), under which the Distributor acts as underwriter to engage in activities designed to assist the Funds in securing purchasers for their shares. The Funds have adopted Shareholder Servicing and Distribution Plans pursuant to Rule 12b-1 under the 1940 Act (the "12b-1 Plans"). Amounts paid under the 12b-1 Plans may compensate the Distributor or others for the activities in the promotion and distribution of each Fund's shares and for shareholder servicing. The total amount that the All Cap Value Fund will pay under the 12b-1 Plans for the Class C and Adviser Class shares are 1.00% and 0.25%, respectively, per annum of the Fund's average daily net assets of Class C and Adviser Class shares. For the year ended June 30, 2011, fees incurred by the All Cap Value Fund pursuant to the 12b-1 Plans were \$5,417,179 for Class C and \$154,849 for

Adviser Class Shares. The total amount that the Strategic Fund will pay under the 12b-1 Plans for the Class A and Class C shares are 0.25% and 1.00%, respectively, per annum of the Fund's average daily net assets of Class A and Class C shares. For the year ended June 30, 2011, fees incurred by the Strategic Fund pursuant to the 12b-1 Plans were \$26,711 for Class A and \$87,259 for Class C shares.

During the year ended June 30, 2011, the All Cap Value Fund and the Strategic Fund paid no brokerage commissions to affiliated broker-dealers in connection with purchases and sales of investment securities.

7 Fund Shares At June 30, 2011, there was an unlimited number of shares of beneficial interest, \$0.001 par value, authorized. The following table summarizes the activity in shares of each class of the Funds:

All Cap Value Fund

	Year Ended June 30, 2011		Year Ended June 30, 2010	
	Class C		Class C	
	Shares	Amount	Shares	Amount

End of period	1,154,124		829,855	

	Year Ended June 30, 2011		Year Ended June 30, 2010	
	Class C		Class C	
	Shares	Amount	Shares	Amount
Shares sold	126,415	\$1,372,873	265,225	\$2,351,193
Shares redeemed	(136,842)	(1,458,800)	(277,879)	(2,375,473)
Capital contribution*	—	—	—	458
Net decrease	(10,427)	\$(85,927)	(12,654)	\$(23,822)
Shares Outstanding:				
Beginning of period	841,268		853,922	
End of period	830,841		841,268	
Total Net Increase	\$3,487,296		\$810,509	

* A capital contribution of \$1,241 and \$905 was made to the All Cap Value Fund and Strategic Fund, respectively, by the fund administrator for compliance violations related to the Funds' investments in money market funds discovered during the year ended June 30, 2010.

8 Line of Credit The All Cap Value Fund has a \$50 million uncommitted line of credit with U.S. Bank, N.A. (the "Bank") to be used for liquidity purposes. The interest rate on any borrowings is the Bank's announced prime rate. During the year ended June 30, 2011, the Fund did not draw upon the line of credit.

9 Indemnifications Under the Trust's organizational documents, its Officers and Trustees are indemnified against certain liabilities arising out of the performance of their duties to the Funds. In addition, in the normal course of business, the Funds enter into contracts that provide general indemnifications to other parties. The Funds' maximum exposure under these arrangements is unknown as this would involve future claims that may be made against the Funds that have not yet occurred. However, the Funds have not had prior claims or losses pursuant to these contracts and expect the risk of loss to be remote.

Report of Independent Registered Public Accounting Firm

To the Shareholders and Board of Trustees of The Olstein Funds:

We have audited the accompanying statement of assets and liabilities of The Olstein Funds (comprising, respectively, the Olstein All Cap Value Fund and the Olstein Strategic Opportunities Fund), including the schedules of investments, as of June 30, 2011, and the related statements of operations, the statements of changes in net assets, and the financial highlights for each of the periods indicated therein. These financial statements and financial highlights are the responsibility of the Funds' management. Our responsibility is to express an opinion on these financial statements and financial highlights based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements and financial highlights are free of material misstatement. We were not engaged to perform an audit of the Funds' internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Funds' internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements and financial highlights, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our procedures included confirmation of securities owned as of June 30, 2011, by correspondence with the custodian and brokers. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements and financial highlights referred to above present fairly, in all material respects, the financial position of each of the respective Funds constituting The Olstein Funds at June 30, 2011, the results of their operations, the changes in their net assets, and the financial highlights for each of the periods indicated therein, in conformity with U.S. generally accepted accounting principles.

THE OLSTEIN FUNDS

Additional Information

PROXY VOTING

The Board of Trustees of the Trust, on behalf of the Funds, has delegated all proxy voting responsibilities related to the portfolio securities held by the Funds to the Investment Manager. A description of the Funds' proxy voting policies and procedures is available without charge, upon request, by calling toll-free 1-800-799-2113. A description is also included in the Funds' Statement of Additional Information, which is available on the SEC's website at <http://www.sec.gov>.

The Investment Manager's proxy voting record for the Funds for annual periods ending June 30 each year will be available to shareholders. The proxy voting record is available, without charge, upon request by calling, toll-free, 1-800-799-2113 and on the SEC website at <http://www.sec.gov>.

PORTFOLIO HOLDINGS

The Funds include complete schedules of their portfolio holdings in the annual and semi-annual reports. The Funds are required to file complete schedules of portfolio holdings with the SEC for the first and third fiscal quarters on Form N-Q. Once filed, the Form N-Q is available, without charge, upon request on the SEC's website at <http://www.sec.gov>. Copies of Form N-Q can also be obtained by (i) visiting the SEC's Public Reference Room in Washington, DC (information on the operation of the Public Reference Room may be obtained by calling 1-800-SEC-0330); (ii) sending your request and a duplicating fee to the SEC's Public Reference Room, Washington, DC 20549-0102; or (iii) sending your request electronically to <http://www.publicinfo@sec.gov>.

BOARD OF TRUSTEES AND OFFICERS OF THE TRUST

The Board of Trustees of the Trust consists of six individuals, four of whom are not “interested persons” of the Trust or Funds as that term is defined in the 1940 Act. The Trustees are fiduciaries for the Funds’ shareholders and are governed by the law of the State of Delaware in this regard. They establish policy for the operation of the Funds and appoint the officers who conduct the daily business of the Funds.

The officers conduct and supervise the daily business operations of the Trust, while the Trustees review such actions and decide on general policy. Compensation to officers and Trustees of the Trust who are affiliated with the Investment Manager is paid by the Investment Manager and not by the Trust.

Information pertaining to the Trustees and Principal Executive Officers of the Funds is set forth below. The SAI includes additional information about the Funds’ Trustees and Officers and is available, without charge, upon request by calling 1-800-799-2113.
