Performance data quoted represents past performance. Past performance does not guarantee future results. All performance stated in this document assumes the reinvestment of dividends and capital gains. We caution shareholders that we can never predict or assure future returns on investments. The investment return and principal value of an investment with our Funds will fluctuate over time so that your shares, when redeemed, may be with more or less than their original cost. Current performance may be lower or higher than the performance data quoted. Click the following links for the annual expense ratios and standardized performance current to the most recent quarter and month end periods for The Olstein All Cap Value Fund.

OLSTEIN ALL CAP VALUE FUND

Letter to Shareholders

DEAR FELLOW SHAREHOLDERS:

For the fiscal year ended June 30, 2015, Class C shares of the Olstein All Cap Value Fund appreciated 9.24%. During the same twelve month period, the S&P 500® Index appreciated 7.42% and the Russell 3000® Index appreciated 7.29%. For the three-year period ended June 30, 2015, Class C shares of the Olstein All Cap Value Fund had an average annual return of 18.35% compared to annualized total returns of 17.31% for the S&P 500® Index and 17.73% for the Russell 3000® Index.

MARKET OUTLOOK

The ongoing financial crisis in Greece, the slowdown in the Chinese economy and the expected negative impact of rising U.S. interest rates and strengthening U.S. dollar caused an increase in market volatility during the first six months of 2015 fueling forecasters' predictions of a market pullback. While there are always forecasters predicting the next market correction or downturn, we believe it is important for investors to weather market events and periods of short-term volatility by favoring the equities of financially strong companies with stable or growing free cash flow, run by managements that have a demonstrated history of deploying cash to the benefit of shareholders.

In the current market, an enormous amount of investor money is flowing into high revenue growth companies with little, if any, free cash flow (e.g., internet, social media, etc.). The money flowing into these high revenue growth companies is coming from the liquidation of industrial stocks that, in

The performance data quoted represents past performance and does not guarantee future results. The Olstein All Cap Value Fund's Class C average annual return for the one-year, five-year, and ten-year periods ended 6/30/15, assuming reinvestment of dividends and capital gain distributions and deduction of the Olstein All Cap Value Fund's maximum CDSC of 1% during the one-year period, was 8.24%, 16.11%, and 5.97%, respectively. Per the Fund's prospectus dated 4/28/15, the expense ratio for the Olstein All Cap Value Fund Class C was 2.28%. Performance and expense ratios for other share classes will vary due to differences in sales charge structure and class expenses. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than performance quoted. To obtain performance data current to the most recent month end please go to our website at www.olsteinfunds.com.

our opinion, are temporarily affected by a strong dollar and a less than robust economy (especially overseas), creating what we believe are deep discount stock purchase opportunities with free cash flow yields as high as 10%. In the current environment, there is a strong case for investing in equity securities of companies whose real economic value is unrecognized by the market, obscured by recent market uncertainty or over shadowed by temporary problems. We believe investors can find viable opportunities by focusing on four primary, company-specific factors: (1) a commitment to maintain a strong financial position as evidenced by a solid balance sheet; (2) an ability to generate sustainable free cash flow; (3) management that intelligently deploys cash balances and free cash flow from operations to increase returns to shareholders; and (4) a stock price that is at a discount to intrinsic value because of short-term factors. We further believe that, by prioritizing these factors, we are investing in companies that are positioned to compete more advantageously as economic growth accelerates.

OUR STRATEGY

There are times when the combination of certain events, such as the Greek financial crisis and slowdown in the Chinese economy, tend to overwhelm equity markets and hit a value-oriented portfolio, such as the Fund's, particularly hard causing a period of short-term underperformance. At the same time, however, from our perspective as long-term value investors, the negative reaction during periods of increased market volatility creates many favorable opportunities for the Fund to buy good companies at bargain prices.

Throughout the Fund's history, Wall Street's obsessive focus on short-term events and obsession with pouring money into "exciting in your face high growth companies" selling at prices and valuations that have already more than discounted the future growth (reducing the probability of future appreciation), often produced significant opportunities for the Fund to purchase stocks in under the radar with 8% to 10% free cash flow yielding companies being thrown out the window to raise money for the overvalued exciting companies. The Fund usually purchases what we believe are undervalued stocks selling at discounts to our calculation of intrinsic value, during periods of pessimism and underperformance by the company or industry that we deem to be temporary. Before purchasing, we conclude that the bargain prices are not warranted by our estimate of the company's normalized ability to produce future free cash flow. Buying high growth companies at any price can reduce future returns. Although growth companies are exciting, the price you pay is critical. For example, the stock of Coca Cola is still not above its 1998 high stock price (when investors believed it was worth 95 times earnings based on assuming nonstop double digit growth forever). We believe we are currently

in one of those periods with many investors buying and selling stocks with little regard for company fundamentals. We, on the other hand, continue to seek and invest in companies that we believe have an ability to deliver long-term value to their shareholders that, in many cases, is not currently recognized by the market. We remain focused on individual companies, their operations and prospects for maintaining or growing sustainable free cash flow. Patience is the most important virtue of a value investor. Forever is an overused word in our industry. Throughout our career, we have seen that whatever is working and/or not working over 3-6 month time periods, the word “forever” is usually attached. Rarely is “forever” true but the word produces both overvalued and undervalued securities in most markets.

PORTFOLIO REVIEW

The Fund’s current portfolio consists of companies that we believe have a sustainable competitive advantage, discernible balance sheet strength, a management team that emphasizes decisions based on cost of capital calculations and deploys free cash flow to create shareholder value and are selling at discounts to our estimate of intrinsic value. We believe companies with these characteristics are poised to eliminate the valuation gaps created by the recent events as the economic growth accelerates.

At June 30, 2015, the Olstein All Cap Value Fund portfolio consisted of 103 holdings with an average weighted market capitalization of \$57.57 billion. During the fiscal year, the Fund initiated positions in 30 companies and strategically added to positions in 27 companies. Over the same time period, the Fund eliminated its holdings in 32 companies and strategically decreased its holdings in another 12 companies.

Positions initiated during the last twelve months include: Alaska Air Group, Brady Corporation, Citizens Financial Group, Discovery Communications, Dorman Products, Dover Corp., DSW Inc., First Niagara Financial Group, HCA Inc., Janus Capital Group, JetBlue Airways, Johnson Controls Inc., Joy Global Inc., Keysight Technologies, MasterCard Inc., MSC Industrial Direct Co., NVIDIA Corp., Oshkosh Truck Corp, Owens-Illinois, Packaging Corp of America, Patterson Companies, Inc., Pentair Ltd., The Travelers Companies, Twenty-First Century Fox, United Parcel Service, Universal Health Services Inc., Vasco Data Security, Viacom Inc., Visa Inc. and The Wendy’s Company.

Positions eliminated during the past twelve months include: 3M Company, ABB Ltd., American Express, Ann Inc., Avery Dennison, Baxter International, CR Bard, Inc., CareFusion Corp., Charles River Laboratories Inc., Cintas Corp., Coca-Cola Company, Deere & Co., Dentsply International Inc., DuPont, Ethan Allen Interiors, Hormel Foods Corp.,

International Game Technology, Jones Lang LaSalle Inc., McDonalds Corp., Newell Rubbermaid Inc., NOW Inc., PetSmart Inc., Quest Diagnostics, Ross Stores Inc., Sysco Corp., Teleflex Inc., TJX Companies Inc., TRW Automotive Holdings, URS Corp., V F Corp., Walt Disney Company and Whole Foods Market Inc. As previously discussed in shareholder letters for the third and fourth quarters of 2014, the Fund eliminated its positions in CareFusion Corp., International Game Technology, PetSmart, Inc., TRW Automotive Holdings and URS Corp. on very favorable terms as these companies were targeted by strategic acquirers during the reporting period.

Our Leaders

The stocks which contributed positively to performance for the twelve-month reporting period include: Sealed Air Corp, Universal Health Services, UnitedHealth Group, Zoetis, Inc., and Ross Stores. At the close of the fiscal year, the Fund continued to hold Sealed Air, Universal Health Services, UnitedHealth Group and Zoetis, Inc. The Fund sold its position in Ross Stores, which it held for a couple of years as the price of the company's stock reached our valuation level during the fourth quarter of 2014.

Our Laggards

Laggards during the twelve-month reporting period include: National Oilwell Varco, Fossil Group, Now, Inc., Vishay Intertechnology and Wesco International. As of the close of the reporting period, the Fund continued to hold National Oilwell Varco, Fossil Group, Vishay Intertechnology and Wesco International in its portfolio. The Fund acquired the equity of NOW as a result of a spinoff from National Oilwell Varco in early June 2014, and held the company's stock despite falling oil prices during the second half of 2014. The Fund liquidated its position in NOW in February of 2015 as oil prices continued to fall and the outlook for oil remained uncertain.

A VALUE INVESTOR'S PERSPECTIVE ON TURBULENT MARKETS

To a certain degree, investor apprehension and concerns about equity markets are understandable when considering the media's breathless coverage of negative events. Whether it is the Greek debt crisis, uncertainty about the future of the Eurozone, the economic slowdown in China or the expected negative impact of a strengthening U.S. dollar on corporate earnings, crises and calamities continue to dominate headlines and shake investor confidence. It feels like yesterday that the media were warning investors about the future devastating impact of the "Fiscal Cliff" and government shutdown right before the stock market went on a material rise. While we do not mini-

mize the potential worst-case scenarios that any of these events may bring to equity markets, we believe it is more important to distinguish between the variability of an investment's value due to temporary market volatility and the likelihood of permanent impairment of an investors' capital. For a value investor, short-term market volatility is less of a concern than the irreversible loss of capital due to the erosion of a company's fundamentals over time. Another meaningful worry for value investors is a poorly timed decision to sell a particular holding by reacting to short-term events that turned out to be temporary and had little to do with a company's long-term ability to generate normalized free cash flow and thus its intrinsic value.

FOCUSING ON FACTORS CONDUCTIVE TO FAVORABLE PERFORMANCE

In our experience, pessimism about the direction of the overall market often leads investors to make poorly timed asset allocation or sell decisions, blinding an investor to the long-term future appreciation potential of companies with a sustainable competitive advantage, discernible balance sheet strength and a management team that effectively adjusts to challenging times to create meaningful shareholder value. Companies with such characteristics are not only poised to overcome temporary valuation gaps created by market volatility but are usually in a position to achieve greater capital appreciation as market conditions improve and economic activity accelerates. While we believe investors are wise to be wary of risk, we also believe that instead of making investment decisions based on market sentiment, investors should focus on opportunities for meaningful capital appreciation by studying opportunities presented by individual company fundamentals after a forensic analysis of financial statements.

From our perspective as value investors, recent market volatility has produced an environment in which there are many individual opportunities that offer investors the potential for above-average capital appreciation. Our quest for value is guided by two prerequisites: (1) a company's ability to generate sustainable future free cash flow; and (2) securities prices that allow us to buy good companies with solid balance sheets and profitable business models at very advantageous prices. These two requirements guide our investment process and force us to focus on a company's future prospects and value while capitalizing on current favorable prices.

Uncertainty and volatility usually present opportunities when determining the future value of a company, even under normal market conditions. However, when market downturns or periods of volatility hit equity markets across the board – roughly half of S&P 500 Index companies have negative year-to-date performance through July 28, 2015 – the stocks of many good

companies are penalized by negative market sentiment or reduced expectations that have little to do with a company's underlying financial performance. A company may have the misfortune of being in a sector that has fallen out of favor or may have material revenues in an industry that is expected to underperform for a period of time. A portion of a company's business may originate from a country or region suffering from a pullback in economic activity or a company may have exposure to an unfavorable economic trend such as falling commodities prices. Whatever the reason, investors often feed off of and into broad negative market sentiment to pull back from a broad range of companies without regard for individual company performance or without considering how well individual companies may weather such adversity. Most investors, as always, believe negative trends or positive trends are forever creating pockets of overvaluation and undervaluation during all markets.

For value investors, this often short-sighted market dynamic creates ample opportunities to buy great companies at substantial discounts which, in turn, sows the seeds for future potential outperformance. We never know the exact timing of sentiment changes and, thus, our timing is based on the size of the discount from our calculation of long-term intrinsic value rather than trying to gauge the specific date that market sentiment changes. For us, the most important metric for identifying superior investment opportunities in an uncertain market is a company's ability to generate future sustainable free cash flow. We look to invest in companies with strong balance sheets that have not only have the financial strength to weather periods of economic uncertainty but have also demonstrated an ability to allocate capital wisely during such challenging periods. Because we are so focused on a company's ability to generate free cash flow during both favorable and unfavorable economic cycles, we often identify many investment opportunities initially overlooked by the market or disregarded by investors too concerned with the volatility or pessimism dominating the 'here and now'. If an investor believes as we do that a company's ability to generate future free cash flow is the primary determinant of its value as an ongoing enterprise, then a company's ability to adapt to a challenging environment and continue to generate sustainable free cash flow will separate it from its competition and eventually draw the favorable attention of equity investors as markets regain a more balanced perspective and the company hopefully begins to show signs of its normalized ability to generate future free cash flow.

We believe an analysis on a company by company basis and not overall market sentiment, should concern investors - what is the cash return an investor can expect from owning a share of a business over the next three to five years, and does that return compensate the investor sufficiently in excess of the risk-free rate for the risk of investing in equities? To us, this last question

holds greater importance at a time when nervous investors are being told, often quite loudly, to avoid equities and seek safer opportunities. We believe such times have the potential to set up significant above-average long-term investment returns.

WHERE WE ARE NOW - THE SEEDS WE'VE SOWN

As previously reported in this letter, as of June 30, 2015, the Olstein All Cap Value Fund portfolio consisted of 103 holdings with the Fund initiating 30 holdings and eliminating 32 holdings over the past twelve months. Of these 103 holdings, the Fund has considerable exposure to unusual value opportunities whose future prospects, in our opinion, are currently unrecognized, misunderstood, disregarded or undervalued by the current market.

Since the beginning of the fiscal year, 25 of the Fund's holdings (representing approximately 27% of the Fund's equity investments) have been the subject of significant announcements, including three merger & acquisition deals, two completed spinoffs as well as a contemplated spinoff; six share repurchase plans, seven substantial dividend increases (four of these dividend increases were announced along with share repurchase programs) and ten activist campaigns. We are hopeful that, over our expected holding period, the Fund will benefit from a continuation of these value-creation initiatives as markets regain a surer footing and activist investors look under the microscope for undervalued free cash flow companies affected by temporary conditions.

What made each of the 23 companies mentioned above that were the subject of value enhancing corporate actions appealing to us as value investors were favorable company-specific characteristics (unique product or service niche, competitive strength, and clean capital structure), an ability to generate sustainable free cash flow and stocks trading at a significant discount to our determination of each company's intrinsic value. While the combination of these factors pointed to significant potential for capital appreciation, our in-depth understanding of each company's potential usually flew in the face of the short-term collective wisdom regarding its future prospects and that is precisely the reason we were able to buy these companies at material discounts. With a period of market volatility added into the mix, the potential for such unusual value situations was further clouded, and, thus, these companies tend to get hit a little harder over the short-term. As with many of our investments, we usually find ourselves patiently waiting for the rest of the market to recognize and understand a company's true investment potential before we see the valuation gap close. We usually keep some cash firepower to add to the positions if the stock prices continue to fall for no apparent long-term value reason. As volatility once again shakes markets,

we realize that it may take a little longer for the market to see what we see and remind you that it is the patient investor that usually reaps above-average rewards. The exact timing as to precisely when (or if) an activist or another catalyst strikes is virtually impossible and that is why we believe the Fund is for investors with a 3-5 year investment horizon. Investors trying to time the Fund based on past experience or temporary moves up or down have been mostly wrong in the past and, we believe, will unfortunately continue to do so. No philosophy or discipline works all of the time and, in fact, any attempt to make this happen is a long term failure process.

FINAL THOUGHTS

As value investors, we believe in having a long-term horizon in an environment that is maniacally focused on short-term events. We believe that our long-term horizon, in conjunction with our emphasis on an in-depth analysis of financial statements, should provide the Fund with an advantage even during the most negative environments. To repeat, we believe in performance over time and believe that any attempt to perform all of the time would be an impediment to performing over time, especially when the core of our philosophy seeks to buy companies at bargain prices. Battleships do not turn on a dime and bargains usually require patience until being discovered by the investment masses. It is our opinion that purchases made in the Fund's portfolio during the most recent period of extreme market negativity should result in higher future rates of return. The market is a discounting mechanism and, while past performance is not necessarily indicative of future results, it is noteworthy that the seeds of past periods of relative outperformance were often sown during previous periods of extreme volatility.

Uncertainty and fear, fueled by troubling news, short-term events and conflicting economic data usually produces the discounted stock prices we seek to take advantage of. Individual stock and/or market declines or just plain misperception, often present us with buying opportunities, especially if we believe the short-term events are of little consequence to the long-term value. While price declines present us with buying opportunities, low stock prices are not the sole criteria for buying companies for our portfolio under our strict free cash flow value-based stock selection criteria. Additional criteria include: strong balance sheets; well-run operations which have the ability to consistently generate excess free cash flow and company managements with a disciplined track record of improving the returns of the business.

We believe the best approach for an uneven economic and investment environment is to buy companies that have the ability to generate free cash flow, have little or no debt or are aggressively paying down debt and to buy such companies at a significant discount to our assessment of their intrinsic value.

The Fund's portfolio primarily consists of fiscally strong, excess cash flow companies whose businesses, in our opinion, are primed to provide suitable returns over the long-term.

We value your trust and remind you that our money is invested alongside yours as we work hard to accomplish the Fund's objective of long-term capital appreciation. We look forward to writing to you again at the close of the next quarter.

Sincerely,

Robert A. Olstein
Chairman and Chief Investment Officer

Eric Heyman
Co-Portfolio Manager

The following chart illustrates the growth, on a quarterly basis, of a hypothetical \$10,000 investment made in the Olstein All Cap Value Fund's Class C share at the Olstein All Cap Value Fund's inception date of September 21, 1995. (With dividends and capital gain distributions reinvested but no deduction of taxes on reinvested distributions—see important disclosures below):

Details:

The performance data quoted represents past performance and does not guarantee future results. The Olstein All Cap Value Fund's Class C average annual return for the one-year, five-year, and ten-year periods ended 6/30/15, assuming reinvestment

of dividends and capital gain distributions and deduction of the Olstein All Cap Value Fund's maximum CDSC of 1% during the one-year period, was 8.24%, 16.11%, and 5.97%, respectively. Per the Fund's prospectus dated 4/28/15, the expense ratio for the Olstein All Cap Value Fund Class C was 2.28%. Performance and expense ratios for other share classes will vary due to differences in sales charge structure and class expenses. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than performance quoted. To obtain performance data current to the most recent month end please go to our website at www.olsteinfunds.com.

A current prospectus may be obtained by calling (800) 799-2113 or visiting The Olstein Funds' website at www.olsteinfunds.com.

The above represents opinion, and is not intended to be a forecast of future events, a guarantee of future results, or investment advice. The references to securities are not buy or sell recommendations, but are intended to be descriptive examples of the Fund's investment philosophy and are subject to change. Do not make investments based on the securities referenced.

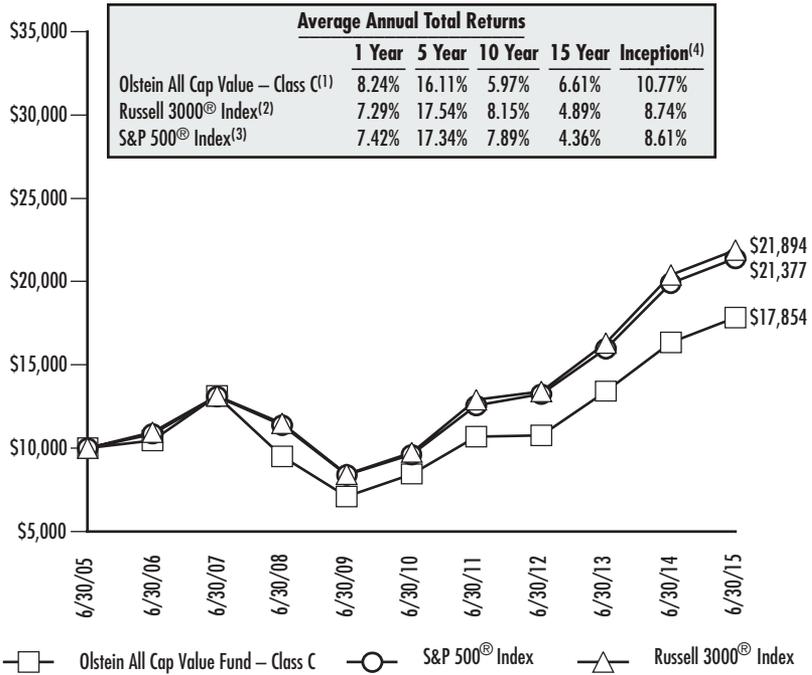

The Olstein Funds follow a value-oriented investment approach. However, a particular value stock may not increase in price as the Investment Manager anticipates and may actually decline in price if other investors fail to recognize the stock's value or if a catalyst that the Investment Manager believes will increase the price of the stock does not occur or does not affect the price of the stock in the manner or to the degree that the Investment Manager anticipated. Also, the Investment Manager's calculation of a stock's private market value involves estimates of future cash flow which may prove to be incorrect and, therefore, could result in sales of the stock at prices lower than the Fund's original purchase price.

The S&P 500® Index is an unmanaged index created by Standard & Poor's Corporation that includes a representative sample of 500 leading companies in leading industries of the U.S. economy and is considered to represent the U.S. stock market performance in general. The Russell 3000® Index is an unmanaged index that measures the performance of the 3,000 largest U.S. companies based on total market capitalization, and represents approximately 98% of the investable U.S. Equity market. Investors cannot actually make investments in either index.

Not FDIC insured – Not bank-guaranteed – May lose value.

Comparison of the Change in Value of a Hypothetical \$10,000 Investment from the Fund's Class C for the past 10 years through the Fiscal Year End of 6/30/15. The line chart does not reflect any applicable Contingent Deferred Sales Charge. The returns listed in the table do not reflect the deduction of taxes on Fund distributions or the redemption of Fund shares.

- (1) Assumes reinvestment of dividends and capital gains. Also includes all expenses at the end of each period and assumes the deduction of the appropriate CDSC as if an investor had redeemed at the end of the one year period, and thus represents a "net return." The CDSC is based on the lesser of the original purchase price and the value of such shares at the time of redemption. Past performance is not necessarily indicative of future results. Investment returns and principal values may fluctuate, so that, when redeemed, shares may be worth more or less than their original cost.
- (2) The Russell 3000[®] Index reflects the broad U.S. equity universe and represents approximately 98% of the U.S. market. Russell 3000[®] Index return is adjusted upward to reflect reinvested dividends, but does not reflect the deduction of any fees or expenses associated with investments in the index, and thus represents a "gross return."
- (3) S&P 500[®] Index return is adjusted upward to reflect reinvested dividends, but does not reflect the deduction of any fees or expenses associated with investment in the index, and thus represents a "gross return."
- (4) Commenced operations on September 21, 1995.

Comparison of the Change in Value of a Hypothetical \$10,000 Investment from the Fund's Adviser Class for the past 10 years through the Fiscal Year End of 6/30/15. The returns listed in the table do not reflect the deduction of taxes on Fund distributions or the redemption of Fund shares.

(1) Assumes reinvestment of dividends and capital gains. Also includes all expenses for each period and thus represents a "net return". Past performance is not necessarily indicative of future results. Investment returns and principal values may fluctuate, so that, when redeemed, shares may be worth more or less than their original cost.

(2) The Russell 3000[®] Index reflects the broad U.S. equity universe and represents approximately 98% of the U.S. market. Russell 3000[®] Index return is adjusted upward to reflect reinvested dividends, but does not reflect the deduction of any fees or expenses associated with investments in the index, and thus represents a "gross return".

(3) S&P 500[®] Index return is adjusted upward to reflect reinvested dividends, but does not reflect the deduction of any fees or expenses associated with investment in the index, and thus represents a "gross return."

(4) Commenced operations on September 21, 1999.

Olstein All Cap Value Fund

Expense Example as of June 30, 2015

As a shareholder of the Fund, you incur two types of costs: (1) transaction costs, including sales charges (loads) on purchase payments or contingent deferred sales charges on redemptions, if any; and (2) ongoing costs, including management fees, distribution fees (12b-1), and other Fund expenses. This Example is intended to help you understand your ongoing costs (in dollars) of investing in the Fund and to compare these costs with the ongoing costs of investing in other mutual funds. The Example is based on an investment of \$1,000 invested at the beginning of the period and held for the entire period, January 1, 2015 – June 30, 2015.

Actual Expenses The following table provides information about actual account values and actual expenses. You will be assessed fees for outgoing wire transfers, returned checks and stop payment orders at prevailing rates charged by U.S. Bancorp Fund Services, LLC, the Fund's transfer agent. If you request that a redemption be made by a wire transfer, currently a \$15 fee is charged by the Fund's transfer agent. IRA accounts will be charged a \$15 annual maintenance fee and a \$25 distribution fee. The following example includes, but is not limited to, management fees, distribution fees, fund accounting, custody and transfer agent fees. However, the following example does not include portfolio trading commissions and related expenses. You may use the information in this table, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the table under the heading entitled "Expenses Paid During Period" to estimate the expenses you paid on your account during this period.

Hypothetical Example for Comparison Purposes The following table also provides information about hypothetical account values and hypothetical expenses based on the Fund's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in the Fund and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other funds.

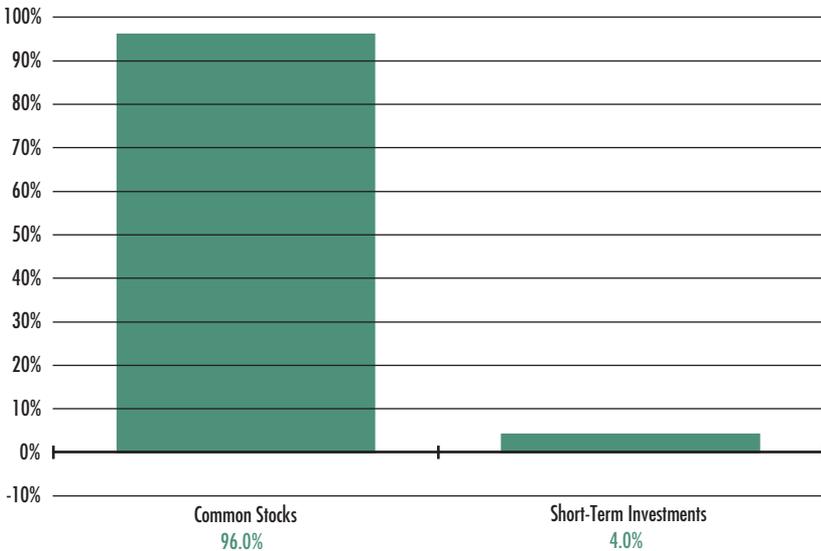

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as sales charges (loads) on purchase payments or contingent deferred sales charges on redemptions, if any. Therefore, the hypothetical information is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher.

All Cap Value Fund

	Beginning Account Value 1/1/15	Ending Account Value 6/30/15	Expenses Paid During Period* 1/1/15 – 6/30/15
Actual			
Class C	\$1,000.00	\$994.90	\$11.13
Adviser Class	\$1,000.00	\$999.60	\$6.20
Hypothetical (5% annual return before expenses)			
Class C	\$1,000.00	\$1,013.64	\$11.23
Adviser Class	\$1,000.00	\$1,018.60	\$6.26

* Expenses are equal to the Fund's annualized expense ratio of 2.25% and 1.25% for Class C and Adviser Class, respectively, multiplied by the average account value over the period, multiplied by 181/365 (to reflect the one-half year period).

Performance data quoted represents past performance. Past performance does not guarantee future results. All performance stated in this document assumes the reinvestment of dividends and capital gains. We caution shareholders that we can never predict or assure future returns on investments. The investment return and principal value of an investment with our Funds will fluctuate over time so that your shares, when redeemed, may be with more or less than their original cost. Current performance may be lower or higher than the performance data quoted. Click the following links for the annual expense ratios and standardized performance current to the most recent quarter and month end periods for The Olstein Strategic Opportunities Fund.

OLSTEIN STRATEGIC OPPORTUNITIES FUND

Letter to Shareholders

DEAR FELLOW SHAREHOLDERS:

For the fiscal year ended June 30, 2015, load-waived Class A shares of the Olstein Strategic Opportunities Fund appreciated 7.19% compared to total returns of 5.92% and 7.42% for the Russell 2500™ Index and the S&P 500® Index, respectively. For the three years ended June 30, 2015, load-waived Class A shares of the Olstein Strategic Opportunities Fund had an average annual return of 21.44% compared to average annual returns of 18.66% for the Russell 2500™ Index and 17.31% for the S&P 500® Index over the same time period.

MARKET OUTLOOK & STRATEGY

A sharp increase in volatility during the first six months of the year, triggered by the ongoing financial crisis in Greece, a slowdown in the Chinese economy, the expected negative impact from rising U.S. interest rates and the strengthening U.S. dollar, dampened equity market returns and further fueled forecasters' predictions of a market pullback. The small- to mid-sized company benchmark Russell 2500™ Index seemed to hold up well during the spike in market volatility, appreciating 4.81% during the first six months of the year, compared to a return of 1.23% for the broader market benchmark S&P 500® Index over the same time period. The relatively strong performance of the Russell 2500 Index, however, was driven primarily by a narrow segment of the index, specifically, a boom in biotech and pharmaceutical firms.

The performance data quoted represents past performance and does not guarantee future results. The Olstein Strategic Opportunities Fund Class A return as of 6/30/15 for the one-year period, five-year period, and since inception (11/1/06), assuming deduction of the maximum Class A sales charge of 5.50% was 1.28%, 18.03% and 8.17%, respectively. Per the Fund's 4/28/15 prospectus, the Fund's Class A expense ratio was 1.61%. Expense ratios for other share classes will vary. Performance for other share classes will vary due to differences in sales charge structure and class expenses. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than performance quoted. To obtain performance data current to the most recent month end, please visit our website at www.olsteinfunds.com.

During the first six months of the year, the Fund experienced a period of underperformance with load-waived Class A shares appreciating 0.40%. There are times when the combination of certain events, (such as the current Greek financial crisis and slowdown in the Chinese economy) tend to overwhelm equity markets. During these times, investors who focus on achieving instantaneous gratification with little patience for disappointments, often liquidate stocks of good companies facing short term issues which are underperforming the market. A value oriented portfolio of small to mid-sized companies (such as the Fund's) that, in our opinion, are selling at discounts as a result of the temporary events, short-term earnings disappointments, misperception or just plain overall negativity, often go through periods of short-term underperformance under these conditions. As long-term value investors, we are currently searching for companies whose long-term value is not affected by these short-term events. In the current environment, we are having no trouble purchasing good companies at what we believe are bargain prices.

We believe we are currently in a period of overall market skittishness, with many investors reacting to short-term company negative news issued by industrial companies, by moving to the sidelines without considering whether or not current prices are more than discounting the long-term potential based on the company's future ability to generate normalized free cash flow. Wall Street's obsessive focus on short-term events has often produced significant opportunities to profit from short-term pessimism when deviations between stock prices and long-term company valuations increase dramatically. We never know the exact timing when (or if) catalysts appear or psychology changes which results in bargain hunters, in mass jumping aboard, quickly eliminating the deviation between a company's stock price and our estimate of intrinsic value. Although we are patient investors, we do expect to see catalysts arise within a 24 month period which should begin eliminating the discount from our calculation of intrinsic value. At times, 24 months seems like a long period of time, and thus, we believe our Fund is better suited for investors with a 2 to 3 year time horizon to fully experience the Fund's investment discipline and strategy. We continue to seek and invest in companies that we believe have an ability to deliver long-term value to their shareholders that, in many cases, is not currently recognized by the market. While there are always forecasters predicting the next market correction or downturn, we believe it is important to weather market events and periods of short-term volatility by favoring the equities of financially strong companies with stable or growing free cash flow, run by managements that have a demonstrated history of deploying cash to the benefit of shareholders and whose stock price is selling at a discount to our estimate of intrinsic value as a result of short-term factors.

PORTFOLIO AND PERFORMANCE REVIEW

At June 30, 2015, the Fund's portfolio consisted of 49 holdings with an average weighted market capitalization of \$3.21 billion. Throughout the year ended June 30, 2015, we continued to modify the portfolio in light of the volatility in the overall market. By paying strict attention to our company valuations, we reduced or eliminated positions in which the discounts from our calculation of intrinsic value were no longer large enough to justify the size of our position. At the same time, we increased or added new positions in what we believe to be well run, conservatively capitalized companies pursuing the correct strategies whose discounts have widened as a result of investor disenchantment with short term stock performance.

During the twelve month reporting period, the Fund initiated positions in twenty companies and strategically added to established positions in another twelve companies. Positions initiated during the past fiscal year include: Blount International, Brady Corporation, Cynosure Inc., Daktronics Inc., DSW Inc., Federal Signal Corp., First Niagara Financial Group, Fox Factory Holding Corp., Joy Global Inc., Keysight Technologies Inc., Land's End Inc., Lifetime Brands Inc., Oshkosh Truck Corp., Owens-Illinois Inc., Patterson Companies, Vasco Data Security, Wabash National Corporation, The Wendy's Company and Wesco International Inc.

During the twelve month reporting period, the Fund eliminated its holdings in twenty companies and strategically reduced its holdings in another three companies. The Fund eliminated or reduced its holdings in companies that either reached our valuation levels, or where, in our opinion, changing conditions or new information resulted in additional risk and/or reduced appreciation potential. We redeployed proceeds from such sales into opportunities that we believe offer a more favorable risk/reward profile. During the fiscal year, the Fund eliminated its holdings in Aegion Corp., Ann Inc., Arctic Cat Inc., Avery Dennison Corp., AVX Corp., CareFusion Corp., Charles River Laboratories, Culp Inc., Ethan Allen Interiors, International Game Technology, Jones Lang LaSalle Inc., NOW Inc., Nutraceutical International Corp., PetSmart Inc., Rocky Brands Inc., Steelcase Inc., Teleflex Inc., UFP Technologies, Inc., URS Corp. and Xylem, Inc. As reported in previous letters to our shareholders, of the twenty companies eliminated from the Fund's portfolio over the course of the fiscal year, five companies were sold due to corporate actions that caused the price of each company's stock to increase to our valuation levels. URS Corporation, International Game Technology and CareFusion entered into merger agreements with strategic acquirers during the reporting period; a private equity firm acquired PetSmart; and an activist investor, as well as a private equity firm, disclosed significant stakes in Ann Inc.

Our Leaders

The stocks which contributed positively to performance for the twelve month reporting period include: Culp, Inc., Sealed Air Corp., Rocky Brands, Integra LifeSciences Corporation and Janus Capital Group. The Fund sold its positions in Culp and Rocky Brands as the price of each company's stock reached our valuation levels. At the close of the fiscal year, the Fund continued to hold Sealed Air, Integra Life Sciences and Janus Capital Group.

Our Laggards

Laggards during the twelve month reporting period include: Blount International, Nutraceutical International Corporation, NOW Inc., CECO Environmental Corp. and Vishay Intertechnology Inc. The Fund liquidated its holdings in Nutraceutical International and NOW Inc. during the reporting period. The Fund sold its position in NOW Inc. as crude oil prices collapsed from over \$100/barrel in mid-June 2014 to under \$55/barrel early in 2015. The Fund sold its position in Nutraceutical International as we questioned company management's understanding of and ability to implement the changes needed to increase shareholder value. At the close of the fiscal year, the Fund continued to hold Blount International, CECO Environmental Corp. and Vishay Intertechnology Inc.

REVIEW OF ACTIVIST HOLDINGS

As of June 30, 2015, the Fund was invested in sixteen activist situations, which represented approximately 33% of the Fund's equity investments, and five of its top ten holdings. In general, these situations fit our definition of an activist investment where Olstein Capital Management or an outside investor, usually a hedge fund, private equity investor, seeks to influence company management to adopt strategic alternatives that we expect to unlock greater shareholder value.

The Fund's activist holdings as of June 30, 2015, include agricultural machine and equipment manufacturer, Blount International; environmental technology company, CECO Environmental; aerospace and defense products manufacturer, Esterline Technologies Corp.; specialty apparel and accessory retailer, Express Inc.; recreational vehicle suspension products manufacturer, Fox Factory Holding Corp.; money management firms, Janus Capital Group and Legg Mason Inc.; multi-channel retailer, Land's End; kitchenware and housewares manufacturer, Lifetime Brands Inc.; department store company, Macy's; glass container manufacturer, Owens-Illinois; specialty eatery, Potbelly Inc.; data solutions company, Teradata Corporation; specialty retailer of nutritional products, Vitamin Shoppe Inc.; fast-food restaurant chain, The Wendy's Company; and industrial equipment supplier, WESCO

International. We continue to monitor the progress of the activist investors involved in these situations as they work to increase shareholder value through a specific plan for improving each company's results. While each investment is at a different strategic stage, we believe the actions that have been proposed or implemented for each company should increase shareholder value through improved future operating results.

With each of our activist situations, one of the most important variables we consider, (especially during tough economic times), is "how long do we expect it to take for this company to improve its operations and results?" Although we know from experience that successful turnarounds don't happen overnight, we do expect specific improvements in operations to occur within a defined period of time (two years or less), notwithstanding the economic environment. Although a turnaround process may not be in full swing, if a company has adopted what we believe is the right strategy to increase shareholder value within two years, we are willing to wait beyond two years for operating results to start improving if we are being sufficiently rewarded for the risk, and if our ongoing analysis of the company's financial statements tell us the company is headed in the right direction.

UNDERSTANDING UNDERVALUATION AND FORECASTING THE FUTURE

Our ongoing search for value focuses on identifying significant deviations between the current price of a stock and our determination of the issuing company's intrinsic value. Our intrinsic value is based on our prediction of a company's normalized ability to produce future free cash flow. One of the primary challenges of our analysis is to understand what is creating the discount; determining if the issues causing the discount are temporary or chronic in nature; and recognizing the circumstances that are likely to close the gap between the company's current stock price and its intrinsic value.

For small- to mid-sized companies, assessing the underlying causes of why a company is undervalued helps us to separate those companies with serious structural, financial or secular problems from those that are simply not performing to their full potential. In a challenging economic environment, understanding the nature of the discount also helps us separate viable value investing opportunities from potential value traps. We seek to determine if the discount is the result of misperceptions about the company, a build-up of unmerited negative sentiment, an over-reaction to temporary bad news, or if it is a result of chronic issues the company is not likely to successfully overcome.

MAKING SENSE OF THE 'DISCOUNT'

Our first mission when analyzing company stocks which appear to be selling at a discounted price is to look for specific financial, competitive and structural characteristics that signal that a company's problems are temporary. When evaluating the investment potential of an undervalued company, we first consider if the company is well positioned to create shareholder value and close the valuation gap. While most companies endure varying degrees of performance problems throughout their life, a challenging economic environment may make it difficult to implement the changes needed to create long-term value and thus successfully close the gap between current stock price and intrinsic value. In light of such challenges, our analysis focuses on several company-specific factors:

The Core Business and Financial Strength: We seek to determine whether the company has a strong core business and a competitive advantage that will allow it to overcome any temporary setbacks negatively affecting its stock price. Since companies that improve their performance after temporary setbacks may find their stocks still held back by negative market sentiment, it is extremely important for us that the core business is able to generate sustainable free cash flow over our anticipated holding period of three years or longer. Free cash flow companies add value while we wait for the catalyst to arrive. Our analysis focuses on how the company's operations generate sustainable free cash flow and the level of investment required to improve company performance and eventually grow the business. We also believe it is extremely important to assess whether the balance sheet is strong enough to ride out the current problems if the issues the company is facing last longer than expected.

Nature of the Company's Problems: For small- to mid-sized companies, an extremely important part of understanding the valuation gap between stock price and intrinsic value is an assessment of the company's difficulties and problems. Some factors contributing to the discount may stem from the company itself, including failure to keep pace with market trends; poor allocation of capital; an under achieving product line or division that needs to be fixed, sold or shut down; too much debt; insufficient operating controls or a weak management team that lacks depth and expertise. Other problems may come from outside the company, such as economic shifts creating headwinds for the business, social change, technological change, regulatory constraints, or misperceptions about the company or its industry. We carefully evaluate the many factors that may have contributed to a company's setbacks, determine the severity of these factors and assess what corrective

measures the company must pursue to successfully reinvigorate the business and whether or not they are currently being instituted.

Clean accounting: We undertake a thorough review of financial statements over the past three to five years to determine if management has masked the scope and depth of the company's problems by creating unrealistic financial statements and results of operations by adopting nonconservative accounting techniques and making financial assumptions which deviate from economic reality. When faced with a significant discount in stock price, it's extremely important to judge the quality of management by its commitment to creating shareholder value, as well as the conservatism and transparency of its financial reporting and how effectively it communicates the company's problems, its strategic alternatives to be adopted and assess the economic reality thereof.

Quality of Company Management: In light of a significant gap between the company's stock price and our determination of its intrinsic value, we assess the decision-making skills and leadership of a company's management team. For small- to mid-sized companies, an assessment of management's skill level and experience is critical in light of the company's undervaluation. Management must not only recognize the true extent of the company's problems and identify solutions that are in the best interests of shareholders, management should have the requisite skills and experience to effect needed change. An ongoing analysis of a company's financial statements, accompanying footnotes and shareholder communications help us determine whether management's actions have resulted or are likely to result in real fundamental progress towards closing the valuation gap.

As balanced and experienced investors, we constantly look out for company-specific factors that may signal a potential value trap. We avoid situations where a company's core business has failed to keep pace with dramatic changes in the economic, competitive or technological landscape or companies with products and services that have become less relevant to the market. We also avoid companies which have fallen to what appears to be undervalued territory that, in our opinion, have weak balance sheets, lack significant financial resources to ride out economic storms or do not exert proper control over existing resources through proper cash flow management, working capital controls, meaningful cost reduction efforts, and appropriate return on investment and profitability analysis.

CLOSING THE VALUATION GAP

Following our assessment of the factors we believe have created the discount between a company's current stock price and its intrinsic value, we conduct a deeper analysis of those companies that we believe have normalized free cash flow potential that is not recognized or properly valued by the market. In order to reach conclusions about unrecognized future free cash flow potential, we undertake an intensive, forensic analysis of a company's financial statements, footnotes and other regulatory filings in order to develop a deeper understanding of the stability and reliability of the company's free cash flow potential under different economic scenarios, and to assess the capabilities and fiscal conservatism of the management team and finally, the quality of its earnings.

Company managements make mistakes all the time. Some are financial, some operational, some strategic – almost all weigh on the stock price in the near term. For small- to mid-sized companies that have been unduly penalized by short-term market reactions or negative sentiment, we seek to identify a catalyst or strategic alternatives that we believe will unlock the company's underlying value and accelerate closing of the valuation gap. Some potential catalysts we analyze when considering investments for the Fund include;

Unrecognized or Hidden Free Cash Flow Potential: We look for companies that generate significant cash flow from their operations, but due to various reasons, net income (reported earnings per share) is materially below what the company actually generates in free cash flow. In these cases, we look at the company's free cash flow yield, (calculated as cash flow divided by the enterprise value), to determine if the cash flow yield is materially above competitive yields in the bond market or stock market. Our experience indicates that companies with above average free cash flow yields combined with strong (or improving) returns on invested capital and strong returns on assets have a higher probability of successfully managing temporary problems and are likely to provide increasing value to shareholders over time.

Niche Power: Some small- to mid-sized companies provide unique, essential, niche products and/or services, with few true substitutes capable of displacing the product or service in the market. However, as a result of various circumstances, the company does not realize its true earnings potential, often weighed down by a *status quo* view, misconceptions or mismanagement. With niche power, the company may be able to change marketing and sales techniques or undertake price or volume increases that, once properly implemented, can lead directly to margin and earnings increases which should eventually result in increased shareholder value.

Segment Analysis: A company's stock price is often disproportionately penalized if the company has an underperforming business segment that is hiding a company's normalized long-term ability to generate future free cash flow, even though the underperforming segment may represent only a fraction of the company's overall earnings. We assess the true earnings power of all of a company's segments to determine our intrinsic value and recognize that if an underperforming segment improves or is jettisoned, the company's shares are more likely to move towards fair value.

Hidden Assets/Liquidity: We spend a lot of time analyzing balance sheets of companies looking for assets that are either not utilized efficiently or not essential to the company's operations. These assets can include licenses, intangibles, non-core divisions or real estate. We believe value can be created if companies monetize non-core assets and allocate capital to more strategic operations, complementary acquisitions, debt pay-down, or increased returns to shareholders.

Management Changes: Although we are known for not talking to management, we are very concerned with what a company's management actually does. We evaluate management by judging what they actually do rather than what they say by undertaking an inferential analysis of current and historical shareholder letters, financial statements, footnotes and disclosure practices, looking for clues that changes are being implemented and assessing a company's normalized ability to generate future free cash flow. We emphasize financial strength first by evaluating the conservation of the balance sheet and look behind all the numbers and disclosures to determine whether or not the statements are in accord with economic reality. For many small- to mid-sized companies, the quality and skill of the management team is a key determinant of whether or not the company is likely to increase shareholder value. Managements that are inconsistent, unwilling to judge their performance against previously stated objectives and too focused on temporary fixes cannot serve as catalysts for unlocking a company's unrealized value. In many cases, a management team that lacks the expertise needed to succeed in the company's market or a management team that lacks the appropriate emphasis on returns on invested capital can be improved by hiring new team members with the required skills and experience. In other cases, management teams that consistently exhibit poor decision-making and questionable leadership skills may need to be replaced in their entirety.

STAYING FOCUSED ON FUNDAMENTALS

Another critical element of our analytical process lies in our ability to identify and separate those factors likely to affect a company's future prosperity – its future free cash flow – from the excessive “noise” that characterizes today's investing environment. We filter a great deal of noise, particularly the short-term price predictions of the analysts and financial press, pay little attention to the quarterly reporting game whereby analysts are obsessively assessing whether or not estimates were beaten or missed, rather than assessing whether or not there is any information reported in the quarter that could result in a long-term valuation change. We pay little attention to the constant onslaught of market predictions and top-down economic news, forecasts and data, by focusing on the fundamental merits of a company's underlying business. We seek to estimate a company's future earnings and free cash flow potential by assessing the resiliency of its business model in both favorable and unfavorable economic environments.

While we are concerned with the overall economic environment and outlook and recognize that macro-economic factors and other newsworthy events can exert extreme short-term influence over equity prices from time to time, we are more concerned with how individual companies operate under all types of economic conditions and cycles, and whether or not we are being compensated for taking the risk of an equity investment that includes predicting the company's ability to generate future free cash flow and thus its intrinsic value. We believe it is an important job of company management to adequately anticipate and plan for the impact of macro-economic shifts on their business and its ability to generate sustainable free cash flow. From our focused analysis of a company, we judge its resiliency in the face of macro-economic shifts and shocks and incorporate that judgment into our future normalized cash flow projections which is the only arbiter of long-term intrinsic value.

FINAL THOUGHTS

Since we launched the Olstein Strategic Opportunities Fund more than eight years ago, we have identified many small- to mid-sized companies that have successfully navigated turbulent economic times to adapt, invest, grow and restructure for the future. As economic news and events overwhelm equity markets from time to time, we believe it is critical to remain focused on company fundamentals as we wait for equity markets to regain a balanced perspective with regard to future company fundamentals. We remind you that, as the past has proven, patience usually provides generous opportunities for the diligent investor. We intend to stay the course (despite short term disappointment) since we are invested in companies that we believe have the financial strength to ride out current market jitters while offering favorable long-term

business prospects and, in our opinion, are materially undervalued. We appreciate your trust and our personal funds are invested alongside yours.

Sincerely,

Eric R. Heyman
Co-Portfolio Manager

Robert A. Olstein
Chairman, Chief Investment Officer
and Co-Portfolio Manager

The above represents the opinion of the Manager, and is not intended to be a forecast of future events, a guarantee of future results, or investment advice. The references to securities are not buy or sell recommendations, but are intended to be descriptive examples of the Fund's investment philosophy and are subject to change. Do not make investments based on the securities referenced. A full schedule of Fund holdings as of 6/30/15 is contained in this report, and is subject to change. This information should be preceded or accompanied by a current prospectus, which contains more complete information, including investment objectives, risks, charges and expenses of the Olstein Funds and should be read carefully before investing. A current prospectus may be obtained by calling (800) 799-2113 or visiting the Olstein Funds' website at www.olsteinfunds.com.

The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. There is no assurance that the Fund will achieve its investment objective.

An investment in a portfolio containing small- and mid-cap companies is subject to additional risks, as the share prices of small- and mid-cap companies are often more volatile than those of larger companies due to several factors, including limited trading volumes, products, financial resources, management inexperience and less publicly available information. The activist strategy invests in stocks of underperforming companies and any shareholder activism might not result in a change in performance or corporate governance. These stocks could also experience less liquidity and higher share price and trading volume volatility than stocks of other companies.

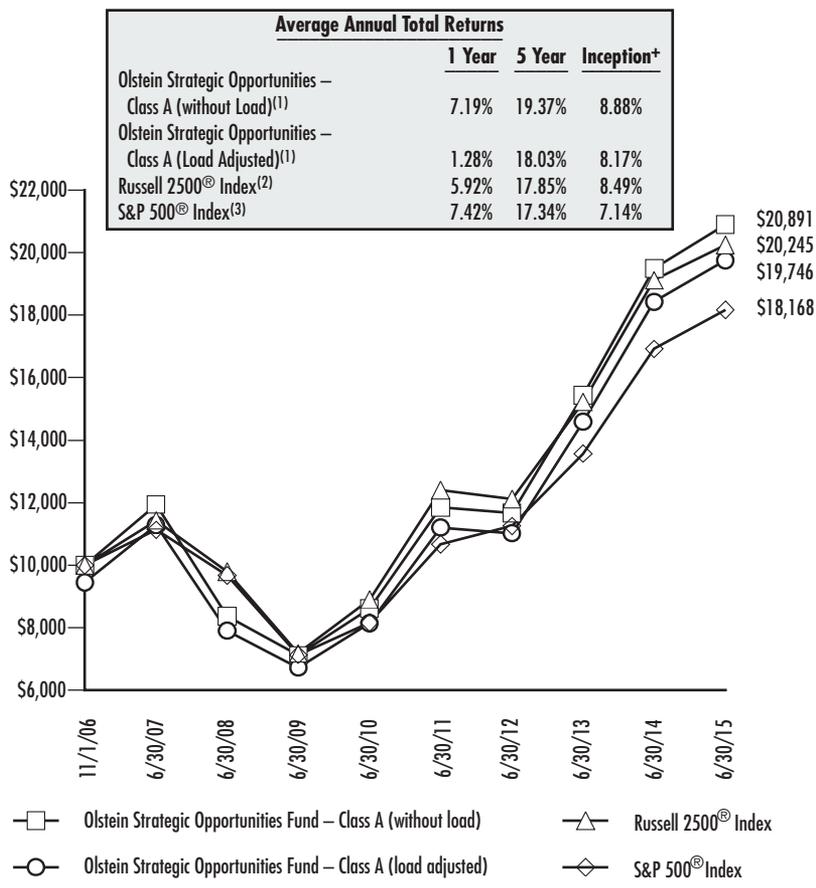

The Russell 2500™ Index is an unmanaged index created by The Russell Investment Group. The Russell 2500™ Index is constructed to provide a comprehensive and unbiased barometer for the small to mid-cap segment and is completely reconstituted annually to ensure larger stocks do not distort the performance and characteristics of the true small to mid-cap opportunity set. The Russell 2500™ Index includes the smallest 2500 securities in the Russell 3000™ Index. The

Russell 2500™ Index is not an investment product available for purchase. The S&P 500® Index is an unmanaged index created by Standard & Poor's Corporation that includes a representative sample of 500 leading companies in leading industries of the U.S. economy and is considered to represent the U.S. stock market performance in general.

Comparison of the Change in Value of a Hypothetical \$10,000 Investment from the Fund's Class A Inception through the Fiscal Year End of 6/30/15. The returns listed in the table do not reflect the deduction of taxes on Fund distributions or the redemption of Fund shares.

⁺ Commencement of operations was November 1, 2006.

- (1) Assumes reinvestment of dividends and capital gains. Reflects the effect of the maximum sale load charge of 5.50% in load adjusted return. Past performance is not necessarily indicative of future results. Investment returns and principal values may fluctuate, so that, when redeemed, shares may be worth more or less than their original cost.
- (2) The Russell 2500[®] Index measures the performance of the 2,500 smallest companies in the Russell 3000[®] Index. Russell 2500[®] Index return is adjusted upward to reflect reinvested dividends, but does not reflect the deduction of any fees or expenses associated with investments in the index, and thus represents a "gross return."
- (3) S&P 500[®] Index return is adjusted upward to reflect reinvested dividends, but does not reflect the deduction of any fees or expenses associated with investment in the index, and thus represents a "gross return."

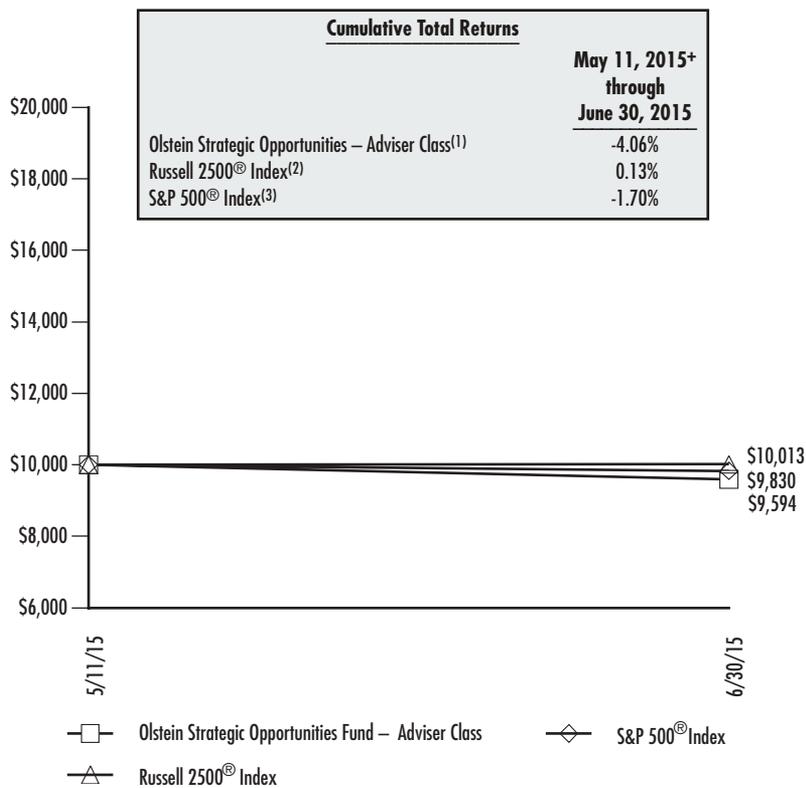

Comparison of the Change in Value of a Hypothetical \$10,000 Investment from the Fund's Class C Inception through the Fiscal Year End of 6/30/15. The line chart does not reflect any applicable Contingent Deferred Sales Charge. The returns listed in the table do not reflect the deduction of taxes on Fund distributions or the redemption of Fund shares.

⁺ Commencement of operations was November 1, 2006.

- (1) Assumes reinvestment of dividends and capital gains. Also includes all expenses at the end of each period and assumes the deduction of the appropriate CDSC as if an investor had redeemed at the end of the one year period, and thus represents a "net return." The CDSC is based on the lesser of the original purchase price or the value of such shares at the time of redemption. Past performance is not necessarily indicative of future results. Investment returns and principal values may fluctuate, so that, when redeemed, shares may be worth more or less than their original cost.
- (2) The Russell 2500[®] Index measures the performance of the 2,500 smallest companies in the Russell 3000[®] Index. Russell 2500[®] Index return is adjusted upward to reflect reinvested dividends, but does not reflect the deduction of any fees or expenses associated with investments in the index, and thus represents a "gross return."
- (3) S&P 500[®] Index return is adjusted upward to reflect reinvested dividends, but does not reflect the deduction of any fees or expenses associated with investment in the index, and thus represents a "gross return."

Comparison of the Change in Value of a Hypothetical \$10,000 Investment from the Fund's Adviser Class Inception through the Fiscal Year End of 6/30/15. The returns listed in the table do not reflect the deduction of taxes on reinvested dividends.

+ Commencement of operations.

- (1) Assumes reinvestment of dividends and capital gains. Also includes all expenses at the end of each period and thus represents a "net return." Past performance is not necessarily indicative of future results. Investment returns and principal values may fluctuate, so that, when redeemed, shares may be worth more or less than their original cost.
- (2) The Russell 2500[®] Index measures the performance of the 2,500 smallest companies in the Russell 3000[®] Index, which represents approximately 20% of the total market capitalization of the Russell 3000[®] Index. Russell 2500[®] Index return is adjusted upward to reflect reinvested dividends, but does not reflect the deduction of any fees or expenses associated with investments in the index, and thus represents a "gross return."
- (3) S&P 500[®] Index return is adjusted upward to reflect reinvested dividends, but does not reflect the deduction of any fees or expenses associated with investment in the index, and thus represents a "gross return."

Olstein Strategic Opportunities Fund

Expense Example as of June 30, 2015

As a shareholder of the Fund, you incur two types of costs: (1) transaction costs, including sales charges (loads) on purchase payments or contingent deferred sales charges on redemptions, if any; and (2) ongoing costs, including management fees, distribution fees (12b-1), and other Fund expenses. This Example is intended to help you understand your ongoing costs (in dollars) of investing in the Fund and to compare these costs with the ongoing costs of investing in other mutual funds. The Example is based on an investment of \$1,000 invested at the beginning of the period and held for the entire period, January 1, 2015 – June 30, 2015.

Actual Expenses The following table provides information about actual account values and actual expenses. You will be assessed fees for outgoing wire transfers, returned checks and stop payment orders at prevailing rates charged by U.S. Bancorp Fund Services, LLC, the Fund's transfer agent. If you request that a redemption be made by a wire transfer, currently a \$15 fee is charged by the Fund's transfer agent. IRA accounts will be charged a \$15 annual maintenance fee and a \$25 distribution fee. The following example includes, but is not limited to, management fees, distribution fees, fund accounting, custody and transfer agent fees. However, the following example does not include portfolio trading commissions and related expenses. You may use the information in this table, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the table under the heading entitled "Expenses Paid During Period" to estimate the expenses you paid on your account during this period.

Hypothetical Example for Comparison Purposes The following table also provides information about hypothetical account values and hypothetical expenses based on the Fund's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in the Fund and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as sales charges (loads) on purchase payments or contingent deferred sales charges on redemptions, if any. Therefore, the hypothetical information is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher.

The Olstein Funds

Notes to Financial Statements

- 1 Description of the Funds** The Olstein Funds (the “Trust”), a Delaware statutory trust organized on March 31, 1995, is registered under the Investment Company Act of 1940, as amended (the “1940 Act”), as an open-end investment management company. The Trust consists of two series, the Olstein All Cap Value Fund (“All Cap Value Fund”) and the Olstein Strategic Opportunities Fund (“Strategic Fund”) (collectively, the “Funds”). Each Fund is a diversified investment management company. The primary investment objective of each Fund is long-term capital appreciation with a secondary objective of income. The All Cap Value Fund commenced investment operations on September 21, 1995, and the Strategic Fund commenced operations on November 1, 2006.

The All Cap Value Fund issued a second class of shares, Adviser Class shares, and renamed the initial class as Class C shares on September 1, 1999. The Adviser Class shares were initially sold on September 21, 1999, and were subject to expenses pursuant to the Shareholder Servicing and Distribution Plan described in Note 6 through October 30, 2013 and was eliminated thereafter. The Class C shares are subject to a contingent deferred sales charge (“CDSC”) for redemptions in accordance with the All Cap Value Fund’s prospectus, and expenses pursuant to the Shareholder Servicing and Distribution Plan described in Note 6. The maximum CDSC is 1.00% based on the lesser of the original purchase price or the value of such shares at the time of redemption for Class C shares within one year of purchase.

The Strategic Fund offers Class A and Class C shares, which are subject to expenses pursuant to the Shareholder Servicing and Distribution Plan described in Note 6. Class A shares have a maximum front-end sales charge of 5.50% that is included in the offering price of the Class A shares. The Class C shares are subject to a CDSC for redemptions within one year of purchase in accordance with the Strategic Fund’s prospectus. The maximum CDSC is 1.00% based on the lesser of the original purchase price or the value of such shares at the time of redemption. The Strategic Fund offered a third class of shares, Adviser Class shares, on April 28, 2015, which were initially sold on May 11, 2015.

2 Significant Accounting Policies The following is a summary of the significant accounting policies of the Funds:

Security Valuation. The Funds' equity securities, except securities reported on the NASDAQ NMS or Small Cap exchanges, are valued at their fair value as determined by their last reported sale price on the exchange on which the security is principally traded. Securities traded on NASDAQ NMS or Small Cap exchanges are valued at the NASDAQ Official Closing Price ("NOCP"). Lacking any sales, the security is valued at the mean between the closing bid and asked prices. The value of securities, for which no quotations are readily available, is determined in good faith by, or under procedures approved by, the Board of Trustees (the "Board"). The Board has adopted specific procedures for valuing portfolio securities and delegated the implementation of these procedures to Olstein Capital Management, L.P. ("Olstein" or the "Investment Manager"). The procedures authorize the Investment Manager to make all necessary determinations regarding the fair value of a portfolio security and to report such determinations to the Board of Trustees. The Funds use independent pricing services to assist in pricing portfolio securities.

The Trust has adopted fair valuation accounting standards which establish an authoritative definition of fair value and set out a hierarchy for measuring fair value. These standards require additional disclosures about the various inputs and valuation techniques used to develop the measurements of fair value and a discussion of changes in valuation techniques and related inputs during the period. These standards define fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value hierarchy is organized into three levels based upon the assumptions (referred to as "inputs") used in pricing the asset or liability. These standards state that "observable inputs" reflect the assumptions market participants would use in pricing the asset or liability based on market data obtained from independent sources and "unobservable inputs" reflect an entity's own assumptions about the assumptions market participants would use in pricing the asset or liability. These inputs are summarized in the three broad levels listed below.

Level 1 – Quoted unadjusted prices for identical instruments in active markets to which the Trust has access at the date of measurement.

Level 2 – Quoted prices for similar instruments in active markets; quoted prices for identical or similar instruments in markets that are not active; and model-derived valuations in which all significant inputs and significant value drivers are observable in active markets. Level 2 inputs are those in markets for which there are few transactions, the prices are not current, little public information exists or instances where prices vary substantially over time or among brokered market makers.

Level 3 – Model derived valuations in which one or more significant inputs or significant value drivers are unobservable. Unobservable inputs are those inputs that reflect the Trust's own assumptions that market participants would use to price the asset or liability based on the best available information.

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The following is a summary of the inputs used to value the Funds' investments as of June 30, 2015:

	Level 1	Level 2	Level 3	Total
All Cap Value Fund

Total Investments in Securities	\$223,832,319	\$—	\$—	\$223,832,319

There were no transfers between levels during the reporting period, as compared to their classification from the most recent annual report. It is the Funds' policy to recognize transfers at the end of the reporting period.

Subsequent Events. In preparing these financial statements, the Trust has evaluated events after June 30, 2015 and determined that there were no significant subsequent events that would require adjustment to or additional disclosure in these financial statements.

Federal Income Taxes. Each Fund intends to continue to qualify for treatment as a "regulated investment company" under Subchapter M of the Internal Revenue Code of 1986 and to distribute all of its taxable income to its shareholders. Therefore, no federal income tax provision has been provided.

Distributions to Shareholders. Generally, distributions are declared and paid at least annually. The Funds may utilize earnings and profits distributed to shareholders on redemption of shares as part of the dividend paid deduction.

Distributions of net investment income and net realized gains, if any, are determined in accordance with income tax regulations, which may differ from U.S. generally accepted accounting principles. These differences are either temporary or permanent in nature. To the extent these differences are permanent, reclassifications are made in the capital accounts in the period that the difference arises.

Accordingly, at June 30, 2015, reclassifications were recorded as follows.

	All Cap Value Fund	Strategic Opportunities Fund
Accumulated net investment income	\$ 4,510,980	\$ 1,208,436
Accumulated net realized gain on investments sold	—	(1,208,436)
Capital stock	(4,510,980)	—

Use of Estimates in the Preparation of Financial Statements. The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results may differ from those estimates.

Other. Investment security transactions are accounted for on a trade date basis. The Funds use the specific identification method for determining realized gain or loss on investments for both financial and federal income tax reporting purposes. Dividend income is recognized on the ex-dividend date or as soon as information is available to the Funds and interest income is recognized on an accrual basis. Income, realized and unrealized gains or losses on investments are allocated to each class of shares based on each Fund's relative net assets. All discounts and premiums are amortized using the effective interest method for tax and financial reporting purposes.

Expenses. Expenses directly attributable to a class of shares, such as Rule 12b-1 distribution fees, are charged to that class. Expenses that are not attributable to a particular class are typically allocated within each Fund among each class in proportion to their respective net assets. Expenses incurred by the Trust that do not specifically relate to an individual Fund of the Trust are allocated to the Funds based on each Fund's relative net assets or other appropriate basis deemed fair and equitable by the Trustees.

- 3 Purchases and Sales of Investment Securities** During the year ended June 30, 2015, purchases and sales of investment securities (excluding short-term investments) were as follows:

	Purchases	Sales
All Cap Value Fund	\$439,259,987	\$396,723,332
Strategic Fund	\$181,925,609	\$79,534,327

The Funds did not purchase long-term U.S. Government securities as a part of their investment strategy during the respective periods.

4 Tax Information At June 30, 2015, the components of accumulated earnings/losses on a tax basis were as follows:

	All Cap Value Fund	Strategic Fund
Cost of Investments	\$696,609,195	\$214,312,038
Gross unrealized appreciation	\$101,191,816	\$ 21,797,223
Gross unrealized depreciation	(25,366,870)	(12,276,942)
Net unrealized appreciation	\$ 75,824,946	\$ 9,520,281
Undistributed ordinary income	—	802,207
Undistributed long-term capital gain	74,725,392	7,637,181
Total distributable earnings	74,725,392	8,439,388
Other accumulated losses	\$ (2,211,039)	\$ —
Total accumulated gains	\$148,339,299	\$ 17,959,669

The difference between book-basis and tax-basis net unrealized appreciation is attributable primarily to the tax deferral of losses on wash sales for the All Cap Value Fund and the Strategic Fund.

During the year ended June 30, 2015, the All Cap Value Fund utilized capital loss carryforwards of \$27,583,365.

At June 30, 2015, the Funds deferred, on a tax basis, post-December ordinary late-year losses of:

All Cap Value Fund	\$2,211,039
Strategic Fund	\$ —

The tax components of dividends paid by the Funds during the periods ended June 30, 2015 and June 30, 2014 were as follows:

	Year Ended June 30, 2015	Year Ended June 30, 2014
All Cap Value Fund		
Ordinary Income	\$—	\$—
Long-Term Capital Gain	\$8,530,105	\$—
Strategic Fund		
Ordinary Income	\$1,555,802	\$981,620
Long-Term Capital Gain	\$11,840,442	\$3,421,300

The Funds designated as long-term capital gain dividend, pursuant to Internal Revenue Code Section 852(b)(3), the amount necessary to reduce earnings and profits of the Funds related to net capital gain to zero for the tax years ended June 30, 2015 and 2014.

The Trust has adopted financial reporting rules regarding recognition and measurement of tax positions taken or expected to be taken on a tax return. The Trust has reviewed all open tax years and major jurisdictions and concluded that there is no impact on the Funds' financial position or results of operations as a result of open tax years. Tax years that remain open to examination by major tax jurisdictions include tax years ended June 30, 2012 through June 30, 2015. There is no tax liability resulting from unrecognized tax benefits relating to uncertain income tax positions taken or expected to be taken on tax returns as of and for the year ended June 30, 2015. The Funds are also not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will significantly change in the next twelve months. If applicable, the Funds would recognize interest accrued related to unrecognized tax benefits in "interest expense" and penalties in "other expense" on the statement of operations.

- 5 Investment Management Fee and Other Agreements** The Funds employ Olstein as the investment manager. Pursuant to investment management agreements with the Funds, the Investment Manager selects investments and supervises the assets of the Funds in accordance with the investment objectives, policies and restrictions of the Funds, subject to the supervision and direction of the Board of Trustees. For its services, the Investment Manager earns a monthly fee at the annual rate of 1.00% for the first \$1 billion, 0.95% for \$1 billion to \$1.5 billion, 0.90% for \$1.5 billion to \$2 billion, 0.85% for \$2 billion to \$2.5 billion, 0.80% for \$2.5 billion to \$3 billion and 0.75% for over \$3 billion of the All Cap Value Fund's average daily net assets and 1.00% of the Strategic Fund's average daily net assets. For the year ended June 30, 2015, the All Cap Value Fund incurred investment management fees of \$7,482,883, with \$649,855 payable to the Investment Manager as of June 30, 2015. For the same period, the Strategic Fund incurred management fees of \$1,581,195, with \$159,288 net payable to the Investment Manager as of June 30, 2015. The Investment Manager receivables and payables are settled monthly. The Investment Manager has agreed to contractually waive or reduce all or a portion of its management fee and, if necessary, to bear certain other expenses to limit the annualized expenses of the Strategic Fund to 1.35%, exclusive of 12b-1 and shareholder servicing fees, acquired fund fees and expenses, taxes, interest and non-routine expenses. This agreement extends until October 28, 2015 and may be continued thereafter. The Investment Manager may seek reimbursement of its waived fees and

expenses borne for a rolling three-year period following the fiscal year such fee waivers and expense reimbursements are incurred, provided that the reimbursement by the Strategic Fund of the Investment Manager will not cause total operating expenses to exceed the expense cap as then may be in effect or the expense cap in place at the time of the fee waiver. The Investment Manager recouped \$16,484 in previously waived fees and expenses during the year ended June 30, 2015.

	Strategic Fund
Reimbursed/Absorbed Expenses Subject to Recovery by Investment Manager Until:	
2016	\$60,142
2017	2,278
Total	\$62,420

Certain trustees and officers of the Trust are also officers of the Trust's Investment Manager. Such trustees and officers are paid no fees by the Trust for serving as trustees or officers of the Trust.

- 6 Shareholder Servicing and Distribution Plans** Olstein has entered into a distribution and underwriting agreement with the Funds dated August 18, 1995 (subsequently revised on July 29, 1998 to reflect the additional class and further amended and restated effective October 1, 2007), under which Olstein acts as underwriter to engage in activities designed to assist the Funds in securing purchasers for their shares. The Funds have adopted Shareholder Servicing and Distribution Plans pursuant to Rule 12b-1 under the 1940 Act (the "12b-1 Plans"). Amounts paid under the 12b-1 Plans may compensate Olstein or others for the activities in the promotion and distribution of each Fund's shares and for shareholder servicing. The total amount that the All Cap Value Fund will pay under the 12b-1 Plans for the Class C shares is 1.00%, per annum of the Fund's average daily net assets of Class C shares. The Board voted to terminate the 12b-1 Plan for the Adviser Class shares, effective October 31, 2013. For the year ended June 30, 2015, fees incurred by the All Cap Value Fund pursuant to the 12b-1 Plan were \$6,179,253 for Class C shares. The total amount that the Strategic Fund will pay under the 12b-1 Plans for the Class A and Class C shares are 0.25% and 1.00%, respectively, per annum of the Fund's average daily net assets of Class A and Class C shares, respectively. For the year ended June 30, 2015, fees incurred by the Strategic Fund pursuant to the 12b-1 Plans were \$308,059 for Class A shares and \$334,981 for Class C shares. For the year ended June 30, 2015, Olstein retained \$65,885 from sales charges on the Strategic Fund

Class A shares. During the year ended June 30, 2015, Olstein received contingent deferred sales charges from redeeming shareholders in the amounts of \$2,567 and \$3,148 for the All Cap Value Fund and the Strategic Fund, respectively.

During the year ended June 30, 2015, the All Cap Value Fund and the Strategic Fund paid no brokerage commissions to affiliated broker-dealers in connection with purchases and sales of investment securities.

7 Fund Shares At June 30, 2015, there was an unlimited number of shares of beneficial interest, \$0.001 par value, authorized. The following table summarizes the activity in shares of each class of the Funds:

* Commencement of operations.

8 Line of Credit The All Cap Value Fund and the Strategic Fund have uncommitted lines of credit of \$50 million and \$20 million, respectively, with U.S. Bank, N.A. (the “Bank”), which mature on May 17, 2016, to be used for liquidity purposes. To the extent that the line is utilized, it will be collateralized by securities in the Funds’ portfolios. The interest rate on any borrowings is the Bank’s announced prime rate, which was 3.25% on June 30, 2015.

During the year ended June 30, 2015, the All Cap Value Fund did not draw upon the line of credit. During the year ended June 30, 2015, the Strategic Fund had average outstanding borrowings of \$7,512 under the line of credit and paid a weighted average interest rate of 3.25%. The October 16, 2014 balance of \$2,742,000 was the maximum borrowings during the period.

9 Indemnifications Under the Trust’s organizational documents, its Officers and Trustees are indemnified against certain liabilities arising out of the performance of their duties to the Funds. In addition, in the normal course of business, the Funds enter into contracts that provide general indemnifications to other parties. The Funds’ maximum exposure under these arrangements is unknown as this would involve future claims that may be made against the Funds that have not yet occurred. However, the Funds have not had prior claims or losses pursuant to these contracts and expect the risk of loss to be remote.

Report of Independent Registered Public Accounting Firm

To the Shareholders and Board of Trustees of
The Olstein Funds

We have audited the accompanying statements of assets and liabilities, including the schedules of investments, of The Olstein Funds comprising Olstein All Cap Value Fund and Olstein Strategic Opportunities Fund (the “Funds”) as of June 30, 2015, and the related statements of operations for the year then ended, the statements of changes in net assets for each of the two years in the period then ended, and the financial highlights for each of the four years in the period then ended. These financial statements and financial highlights are the responsibility of the Funds’ management. Our responsibility is to express an opinion on these financial statements and financial highlights based on our audits. The financial highlights for the year ended prior to June 30, 2012, were audited by other auditors whose report dated August 26, 2011, expressed an unqualified opinion on those financial highlights.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements and financial highlights are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. Our procedures included confirmation of securities owned as of June 30, 2015, by correspondence with the custodian and brokers. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements and financial highlights referred to above present fairly, in all material respects, the financial position of each of the Funds constituting The Olstein Funds as of June 30, 2015, the results of their operations for the year then ended, the changes in their net assets for each of the two years in the period then ended, and the financial highlights for each of the four years in the period then ended, in conformity with accounting principles generally accepted in the United States of America.

Our audit was conducted for the purpose of forming an opinion on each Fund’s financial statements and financial highlights as a whole. The information presented on pages 4 through 18, pages 34 through 51, and pages 75 through 80, which is the responsibility of the Funds’ management, is presented for purposes of additional analysis. Such information has not been subjected to the auditing procedures applied in the audit of the financial statements, and accordingly, we do not express an opinion or provide any assurance on it.

THE OLSTEIN FUNDS

Additional Information

PROXY VOTING

The Board of Trustees of the Trust, on behalf of the Funds, has delegated all proxy voting responsibilities related to the portfolio securities held by the Funds to the Investment Manager. A description of the Funds' proxy voting policies and procedures is available without charge, upon request, by calling toll-free 1-800-799-2113. A description is also included in the Funds' Statement of Additional Information, which is available on the SEC's website at <http://www.sec.gov>.

The Investment Manager's proxy voting record for the Funds for annual periods ending June 30 each year will be available to shareholders. The proxy voting record is available, without charge, upon request by calling, toll-free, 1-800-799-2113 and on the SEC website at <http://www.sec.gov>.

PORTFOLIO HOLDINGS

The Funds include complete schedules of their portfolio holdings in the annual and semi-annual reports. The Funds are required to file complete schedules of portfolio holdings with the SEC for the first and third fiscal quarters on Form N-Q. Once filed, the Form N-Q is available, without charge, upon request on the SEC's website at <http://www.sec.gov>. Copies of Form N-Q can also be obtained by: (i) visiting the SEC's Public Reference Room in Washington, DC (information on the operation of the Public Reference Room may be obtained by calling 1-800-SEC-0330); (ii) sending your request and a duplicating fee to the SEC's Public Reference Room, Washington, DC 20549-0102; or (iii) sending your request electronically to <http://www.publicinfo@sec.gov>.

ADDITIONAL TAX INFORMATION

For corporate shareholders in the Strategic Opportunities Fund, the percentage of dividend income distributed for the year ended June 30, 2015, which is designated as qualifying for the dividends received deduction, is 67.23%.

For shareholders in the Strategic Opportunities Fund, the percentage of dividend income distributed for the year ended June 30, 2015, which is designated as qualified dividend income under the Jobs and Growth Tax Relief Act 2003, is 67.23%.

**ADDITIONAL INFORMATION APPLICABLE
TO FOREIGN SHAREHOLDERS ONLY**

The Strategic Opportunities Fund hereby designates 100% of its ordinary income distributions for the fiscal year ended June 30, 2015 as short-term capital gain distributions under Internal Revenue Service Code Section 871(k)(2)(C).

BOARD OF TRUSTEES AND OFFICERS OF THE TRUST

The Board of Trustees of the Trust consists of seven individuals, five of whom are not “interested persons” of the Trust or Funds as that term is defined in the 1940 Act. The Trustees are fiduciaries for the Funds’ shareholders and are governed by the law of the State of Delaware in this regard. They establish policy for the operation of the Funds and appoint the officers who conduct the daily business of the Funds.

The officers conduct and supervise the daily business operations of the Trust, while the Trustees review such actions and decide on general policy. Compensation to officers and Trustees of the Trust who are affiliated with the Investment Manager is paid by the Investment Manager and not by the Trust.

Information pertaining to the Trustees and Principal Executive Officers of the Funds is set forth below. The Statement of Additional Information includes additional information about the Funds’ Trustees and Officers and is available, without charge, upon request by calling 1-800-799-2113.
